

Random Nepleslian Red Characters

This page is a tool for randomly generating [Nepleslian Reds](#) characters. Characters's with lighter skin tones should favor natural hair colors that are lighter and the reverse for darker skins. This of course could be different regarding personality and dyed hair. The vast majority of Nepleslian Red surnames either mean red or have some sort of association with the color.

Male Nepleslian Red

Demetrius Huang is a light-skinned male with black eyes and reddish brown hair. He is 191 centimeters tall.

Female Nepleslian Red

Angel Jang is a chestnut-skinned female with blue eyes and strawberry blonde hair. She is 158 centimeters tall with the measurements 94E-66-97.

For females taller than 180cm, it is best to add 5-10cm to each measurement. Above 190cm, waist would have a minimum around 80 cm. Adjust bust and hips according (minimum of 100).

Artificial Nepleslian Types

The vast majority of Reds are vat-born clones. Once you have the height of the individual, you can determine the body mass and fine tune body measurements based on the type of Artificial Nepleslian you wish to use with the following chart:
