

Android

In Star Army, you can play as an artificially-created person (an android) or as a robot. This guide is focused on existing models but you can also create your own android body. Androids, by definition, are humanoid robots, but you can play non-humanoid robots if you prefer. An example of this is [Crash Mckill](#). Android is a general, masculine term; the female-specific version of an android is called a *gynoid*.

Playable Androids

Androids come in both machine and biological varieties.

Biological

Biological/organic androids are sometimes referred to as *bioroids* or *synths*. They are made of flesh and blood. The line between them and genetically-engineered clones can be thin, especially when they can reproduce; the difference is these were designed and created from scratch instead of being modifications from an existing species. Synth species make up a large portion of the population of the [Yamatai Star Empire](#).
