

Fort Ingestrie

Fort Ingestrie was constructed in [YE 39](#) and serves [Star Army Training Administration](#) as a facility for the [Star Army School of Advanced Infantry Combat](#) special warfare training course. It is located on [Tatiana](#). Fort Ingestrie is named after the commander of the VII Legion, Shosho Ingestrie Clowasti

Fort Ingestrie is located on one of the more equatorial of Tatiana's continents, situated in what is for all intents and purposes a mosquito infested swampy island. It is a small installation in and of itself, only a few square miles in size. Most of the base proper facilities are composed of the Command buildings, various residential facilities, the facilities for training, and a number of hangars and armories. The Fort is protected by a [Ke-P3 Series Defense Towers](#).

History

Fort Ingestrie was built in [YE 39](#) using multiple off the shelf modules to serve as the location of a special training school for infantry.

Facilities

Fort Ingestrie was built from prebuilt modules airdropped into base and assembled on site. This gives the facility a certain look.
