

Ghost Star Fortress

Ghost Star Fortress (NK-S2-02 and/or NK-X1-02) is the remaining one of two older [lori-class Star Fortresses](#) that shared a name. It is currently assigned to the [Second Fleet](#) and serves as a mobile headquarters, shipyard, and urban living space for that fleet.

Ghost Star Fortress can usually be found in the [Nataria Star System](#) but occasionally travels to support fleet operations.

History

Ghost Star Fortress was built in [YE 25](#). Its original registry number was YH-02. Its sister stations were [Ketsurui Star Fortress](#) (NK-X1-01), [Shadow Star Fortress](#) (NK-X1-03), [Image Star Fortress](#) (NK-X1-04) and [Spirit Star Fortress/Spirit City](#) (formerly NK-X1-05, now NK-S4-02).

Phantom, Shadow, and Ghost Regiments, under command of [Empress Yui's](#) third daughter, [Ketsurui Sharie](#), were the [Star Army Intelligence](#) command group for the original [Sixth Fleet](#). Sixth Fleet's planetary forces were the remnants of the Albin Planetary Conquest Force. They have participated in missions including: [Albin Planetary Conquest](#), Occupation of [Planet Nepleslia](#), the Battle of Tau Ceti, the Elysian Battle of Ralfaris, the Jaaq'tah Battle of Ralfaris, and fought the Mishhuvurthyar in The Battle of Nepleslia.

After the Sixth Fleet was disbanded, the Star Fortresses from its Phantom, Ghost, Shadow, and Image divisions were distributed to the [Second Fleet](#) and [First Expeditionary Fleet](#) and kept their names. This confusingly resulted in two stations named Ghost Star Fortress, in two different fleets, for several years.

The first Ghost Star Fortress was moved to the [Second Fleet](#) circa [YE 26/YE 27](#) where it served under the command of former [First Expeditionary Fleet Chujo](#) Satoshi Ayana. Its [registry number](#) was changed to NF-S2-02¹⁾²⁾. It hosted the fleet's [Star Army Intelligence](#) activities. In [YE 31](#) it was stationed at [Himiko System](#).

Confusingly, another Iori-class Ghost Star Fortress also served in the [First Expeditionary Fleet](#) circa [YE 26/YE 27](#)³⁾ until at least [YE 29](#)⁴⁾ under the registry number NK-X1-02. During that time, it served under division commander Chujo [Hisae Emiko](#) and performed functions for the [Star Army Research Administration](#). By [YE 31](#) it was no longer serving in the First Expeditionary Fleet⁵⁾.

Eventually the NK-X1-02 Ghost Star Fortress was decommissioned and key parts, personnel, and functions were merged into the NF-S2-02 Ghost Star Fortress in Second Fleet to extend its operational life. The remaining Ghost Star Fortress kept both identities and answers to both registry numbers.

[YSS Artemis](#) was launched from Ghost Star Fortress in [YE 41](#).
