

Scorpio Star Fortress

Scorpio is a formerly secret research base located near the [Ketsurui Nebula](#). It is the first of the [Zodiac-Class Star Fortress](#) series.

History

The teleporter and the shield barrier modules for the [Ke-M2 "Mindy" Series of Power Armor](#) were invented here.

During the [Second Mishhuvurthyar War](#), the station was heavily damaged: "The Aeon and the rest of the squadron moved cautiously towards Scorpio to assess the station. Katae brought the squadron to a stop just outside the debris cloud that surrounded it. The Zodiac-Class Star Fortress survived. But, it was by no means going to be operational. Katae even from this distance could see great rents torn in the hull of the station. The amount of fire power required to wreak this kind of damage was hard to imagine. Every one of the radial arms had suffered catastrophic damage and was missing one or more sections. Venting plasma could be seen as flares of light from all over the station. The station itself was in a slow tumble as its station keeping systems were clearly overwhelmed by the damage to the systems. Debris from both the station and destroyed ships alike created a deadly cloud that the station rotated within occasionally causing more damage. If the station was salvageable Katae was certain it would be months before it would be operating at any semblance of normal."

Since the war's end, the station has been repaired. In the immediate aftermath of the [Second Mishhuvurthyar War](#), Scorpio Star Fortress's position was in the [Oum system](#) (called UX-25 at the time).

In [YE 36](#), this station became part of the [PAINT](#) public transportation system and has a [Tenba](#) that

regularly visits and provides passenger flights to [Shinjuku Starport](#) on [Hanako's World](#) and [Oum IV](#). This service stopped at the end of [YE 37](#) when Scorpio returned to the [Ketsurui Nebula](#).
