

Ke-M2-D3000 Forearm Ellipsoid Shield

Replacing the standard forearm projectors when they may not be appropriate, the Ellipsoid Shield is a 3-foot tall piece of solid metal built into a mechanism in the armour's vambrace. It is essentially identical to the Daisy's Handheld Shield and may also mount either additional ammunition, supplies or up to 2 missiles (any time available to the Mindy armour) on the underside. If missiles are mounted, they are triggered by remote activation from the armour's [Armor Integrated Electronics System \(AIES\)](#).

Products & Items Database	
Product Name	Forearm Ellipsoid Shield
Nomenclature	Ke-M2-D3000
Year Released	YE 30
