

Operation Bakuwana

A faux [clandestine operation](#) with framework and initial scouting in YE 39, *Bakuwana* is a series of missions and deployments revolving around the [Interstellar Kingdom Of Kuvexia](#)'s efforts to subvert and target the planet of [Anisa System](#).

The events of Operation Bakuwana are to be shown through the plot [SINs Of Anisa: Idol Wars](#) and the operations of [SOFT 555 "Chōchō"](#).

Precedence

Following discoveries and field reports conducted by a team of SIN operatives working internally beneath the field command of [Chusa Shibui Mame](#) in mid [YE 39](#), a team was dispatched to the planet of Anisa to initiate initial observation and confirmation reports. In their first week, SAINT operatives investigated, identified, and secured various assets and civilian members of Yamatai that were under employ or threat of Kuvexian action. Various incidents and files required the planning and consideration of action. All documents and files suggested long-term interest in financially acquiring and uprooting Anisa with an intent to utilize local population of the world as a weapon.

Solution Proposed / Planned Procedure

The additional use of covert and subterfuge-focused operatives; NH-33M assigned operatives will deploy to Anisa as idol members of the popular and growing small chain - [Doki Doki YSA!](#) - as a publicly veiled publicity act. Support operatives will draw initial attention while idol members will most likely be deemed citizens beneath Kuvexian operative eyes; this will allow idol operatives to go unhindered, vanish, and effectively coordinate field operations while support personnel provide inconspicuous decoys and informational transmission relays to field command. Rinse and repeat; procedure will be used to find and procure as many Kuvexian personnel as possible while simultaneously building good will with the Anisa population.

Approval

Authorized by [Ueda Chikako](#) in YE 40 after finalization and administrative distribution of Operation files for proceeding decision; [put into effect](#).

Resources for the Operation

- Unfettered access to the [Doki Doki YSA!](#) corporation as a field asset; this would provide believable cover opportunities and conceal operative purpose.
- Provisional equipment as needed; to be ordered or procured through laundering methods such as secret deliveries or smuggled equipment.
- 3x [Itsavan](#) with the following modifications;
 - Cover-based recolors and paintjobs; iconography depicting the idol covers to promote staff vehicles of the idol tour group
 - Smuggler panels and standard SAINT field command specifications with the following modifications:
 - A compartment with the following [Ke-09 T.O.R.I.](#) models; [Avian](#), [Arachnid](#), and [Koi](#)
 - Deployable [Laser Receptive Fabric](#) awnings; to receive transmission from any assigned [Encrypted Laser Transmitter](#) in field use.
 - [Xiulurium](#) material swap-out and stealth system; this will allow the vehicle to disappear if necessary.
 - Concealed trunk weapon's case; one [Shoulder-Fired Launcher](#), [Anti-Armor Missile](#), [Type 30](#) assigned to each case.
 - Emergency self-destruct explosives paired with 8 blocks of secured [Star Army Explosives](#) (T31PE) and armed with Type 31 Uninterruptable Detonators; to prevent enemy capture of personnel or equipment.
- Initial operation funds to provide for operational foundation, localized outfitting, and advertisement; 200,000 [KS](#)
 - Additional funding will be acquired from cover identity payments and field work.

Personnel Specifications

- [NH-33M \(Miniature\)](#)-fitted field operatives; support personnel comprised of SIN and RISE members of SAINT. Anisa-based locals preferred for selection and inclusion into support and field operative status.
 - The goal of this decision is to make inconspicuous idol targets, promote good will between a minority group within Yamatai through the selected cover allowing exposure to NH-33M fitted Neko, and provide ideally inconspicuously-sized operatives that may elude traditional sensory measures in-place by Kuvexian forces.

Objectives

1. The defeat of Kuvexian forces attempting to hinder, disrupt, and subvert the world of Anisa.
 1. This objective is only to be considered a success if all Kuvexian-aligned and deployed assets are removed from the Field of Operation; specifically from the Anisa system.
2. Capture and acquisition of Kuvexian intelligence operatives for interrogation and eventual disposal; status of detained Kuvexians to be determined on field evaluation and EID decision.
 1. Consultation with military police to be frowned upon at risk of operational disruption; legal fallacy can be held accountable and buried post-operational status.
3. Discovery, Tracking, and Preparatory Targeting of any future and other ongoing Kuvexian subterfuge within the Empire.
