

Operation Social Penetration

- A [Star Army Intelligence](#) operation.

Background

In early YE 30, contact between the Yamatai Empire and the Anarchist Free State was at an official minimum, however, due to certain political events, the situation took on a dramatic change. With the Free State's suspected communications with the SMX representative Melisson, and hacking attempts made by the Free State's hacker cult, the Yamatai Empire has felt the need to investigate Free State operations.

The Plan

Operations begin with the acquisition of equipment to be utilized by the infiltrating group to appear as mercenaries. Yamatai exclusive equipment will be left behind upon deployment.

After the acquisition of equipment, the YC-28 crew will attempt to make contact with the Opportunist's Social Club. After contact is made, the YC-28 crew will maintain their cover and attempt to gather intelligence on the Social Club, while carrying out operations assigned by the Social Club.

When intelligence is gathered, the information is to be reported to Taisho Yui and 'Black Nova'. In the event of the Social Club giving the infiltrating crew an assignment which conflicts with Yamatai interests, the YC-28 crew is to contact their superiors and request direction.
