

YSS Firebird Modifications and Interiors

This page contains information on modifications and interiors of the [YSS Firebird](#).

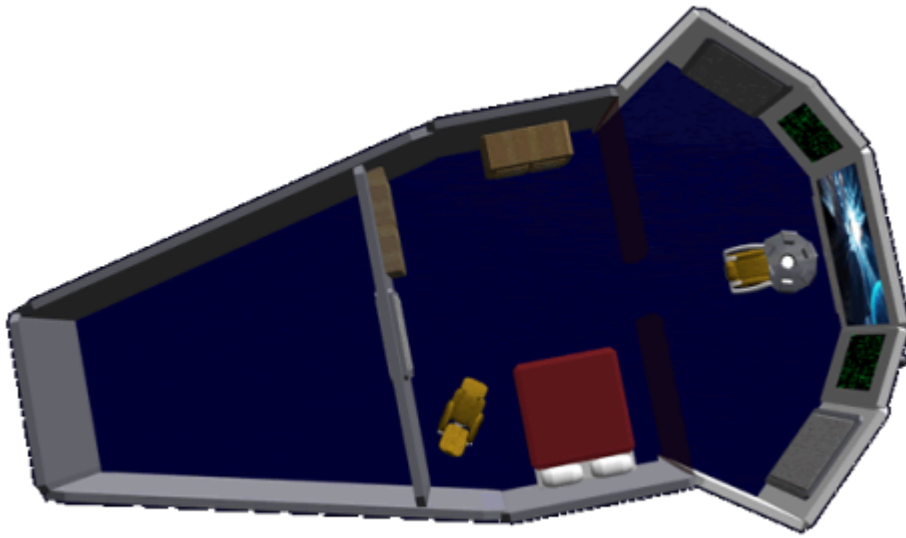

Original Nomenclature: Ke-D2-6E

Interiors

Captain's Quarters

Sune made one small modification to the cabin. He had a sword stand added to the wall where he could mount his swords.

Modifications

When [jalen_sune](#) had the *YSS Firebird* repaired by the [Ketsurui Fleet Yards](#), he had the following modifications accomplished.

Elysian Cloaking System

[Sune](#) added a cloaking system he acquired installed. It is based on the one used on the *Elysian Nariel Assault Battlecruiser* which renders it invisible to aetheric-energy sensors and mass detectors.

Ablative Armor

[Sune](#) had the *YSS Firebird* equipped with the [Ablative Armor](#) system as a precursor to his research project.

Main Weapon

[Sune](#) had the original main cannon replaced with the [Ke-D2-W2900 Phased Pulse Cannon](#).

SPINE

[Sune](#) had all of the bridge stations that had SLICS interfaces replaced with [SPINE](#) ones.

Mnemosyne

The Firebird's original [MEGAMI](#) was destroyed in whatever event the ship was damaged in. [Sune](#) chose to install a [Mnemosyne](#) organic computer system, as part of his prototype work. The [Mnemosyne](#) is the primary computer for the ship, a subordinate [Compact Integrated Electronics System \(CIES\)](#) is installed to handle connectivity to [PANTHEON](#). The Firebird is equipped with the [Type 33 Star Army Communications Network Encryption System](#).

The [Mnemosyne](#) was given the name *Rosalba (White Rose)* by [Sune](#).

Escape Pod Upgrade

The [Sune](#) replaced the ten [Ke-XS-2600es](#) on the Firebird with six [Star Army Escape Pod, Type 30s](#). Since even with a full compliment the six were sufficient for all hands, and the newer pods had FTL capability.

Medbay

While the ship was being repaired, [Sune](#) had the medbay upgraded with a [Type 30 Mental Transfer and Backup Unit](#) and a [Type 32 Remote Backup Unit](#).

Passageways

During the refit, [Sune](#) decided that restoring the artwork in the [Palace-Style Passageways](#) was unwarranted. So ceilings are light blue, simple light units replaced the chandeliers.

Recreation Room

Sune added the following items to provide additional recreational capabilities.

- [VCE Console](#)
- [Te-G1 Anaba Super Karaoke Machine](#)

Weapons Systems

The Firebird carries the following weaponry:

- 1 [Ke-D2-W2900 Phased Pulse Cannon](#) (Tiers 13 through 15, Light Anti-Capital Ship through Heavy Anti-Capital Ship ( **Fix Me!**: Staff needs to determine which))
- 36 [Ke-S3-W2802 Variable Weapons Pods](#) (Tier 9, Heavy Anti-Mecha)
- 1 [KFY Type 27A Torpedo Tube](#)
- 6 [KFY Graviton Beam Projector](#)

Internal Sensors

At the end of [YE 34](#) Sune had three [Type 34 Interior Sensor Systems](#) installed. One on each of the ship's decks and the sub-deck.
