

# YSS Eucharis

YSS *Eucharis*, [NG-X1-408](#), is a modified [Plumeria-class \(2D\) Medium Gunship](#) built at [Gemini Star Fortress](#) by [Ketsurui Fleet Yards](#) in [YE 29](#). She is [commanded](#) by [Taii Sakura Blackberry](#).

*This article is about the ship. For plot information, see [YSS Eucharis Plot](#).*

## About YSS Eucharis

- For crew, see [YSS Eucharis Crew & Personnel](#)
- For inventory see [YSS Eucharis Ship Inventory](#)
- [Eucharis Art Gallery](#)
- [Hanako's Guided Tour of the Ship](#)

## Ship Emblem

The Eucharis emblem consists of the 🌌[cool starship](#) (in its original form) on a background of Yamataian space set within a red circle, surrounded by gold thread. The red circle represents the [Ketsurui Clan](#), and the gold rope represents military (naval) service. The ship's motto does not appear on the emblem (it was designed before the ship had a motto). A patch version of the Eucharis emblem is worn by the crew on their uniforms.

## Ship IRN

The ship's [Imperial Registry Number](#) is NG-X1-408.

## Ship Motto

The *Eucharis*' motto is "*All Ways Superior.*" This is a modification of "*Quality, All Ways,*" the motto of the [YSS Sakura](#).

The motto refers to the crew's duty to keep on top of things (i.e. maintaining control of the situation) and to constantly work to remain technologically superior to the enemy. The wordplay between "All ways"

and “Always” is deliberate and the motto is meant to serve as both expressions.

## Ship Name

Like much of the *Plumeria* series, the ship is named after a type of flower<sup>1)</sup>; Eucharis also was the name of a nymph<sup>2)</sup>. The primary meaning of the word Eucharis comes from the Greek **kharisma**, meaning *grace* or *charm*<sup>3)</sup> {the prefix “eu” denoting *good* or *beautiful*.}<sup>4)</sup>

## Ship Song

Eucharis, Eucharis, we love you! You're strong and tough in all you do,

Eucharis, Eucharis, we love you! We'll take good care of you.

Eucharis Eucharis, we love you! You keep a very lively crew!

Serve the Star Army! Fight the enemy! Charisma, do the best that you can do!

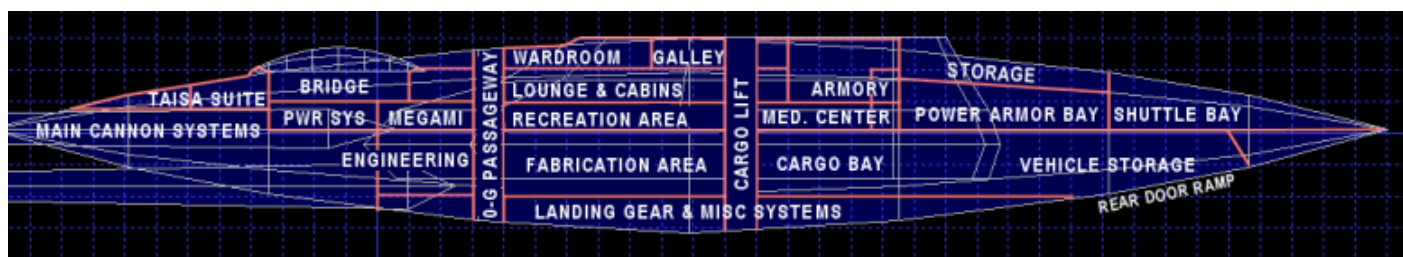

## Modifications

Here's information unique to the *Eucharis*, such as modifications to its interior and its systems.

## Map

## Interior Spaces

Some parts of the Eucharis, especially on deck six and in the cargo bay, have a lingering odor of seawater. Other parts have the signs of fire-burn marks and a smoky odor—that are difficult to get rid of.

## Bridge

The ship's [bridge](#) has a white and red color scheme (colors of the [Ketsurui Clan](#)) and has ship's emblem in the bridge carpeting. The [original rear door](#) was moved to the starboard side and replaced with an extra control station; a second door leading to the captain's suite was added. The bridge entrance is sealed off by a [Forcefield-Nested Isolation Door](#) in addition to its normal [Zesuaium](#) blast shutter. The chairs on the bridge have also been replaced with softer, more adjustable models, which were later replaced with [Starship Chair, Type 35](#).

In the RP, the bridge is often used for [Mission Control](#).

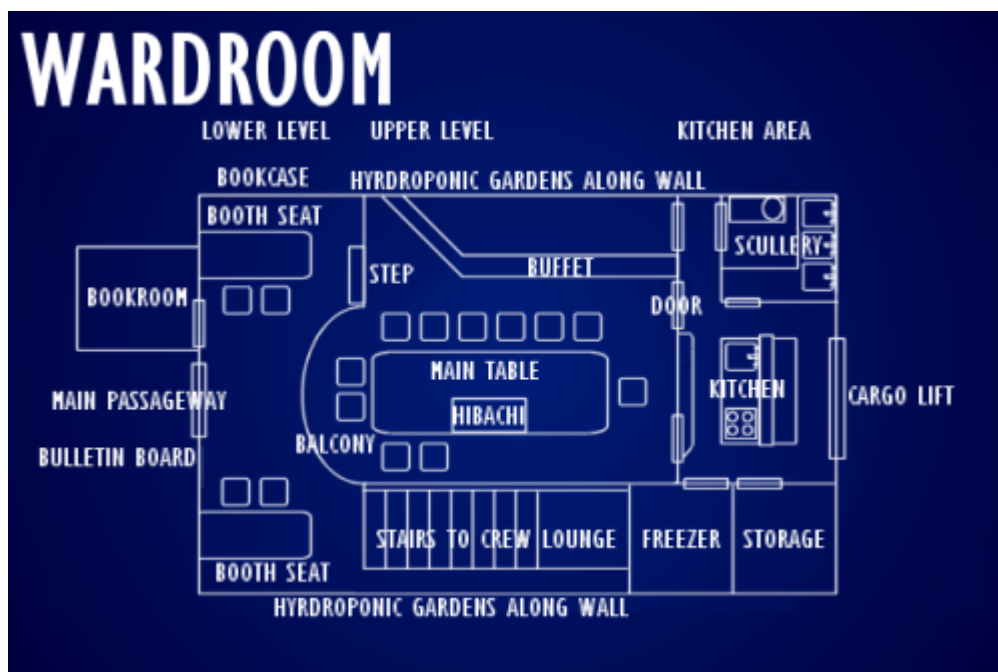

## Engineering

The Eucharis has replaced its radioisotope thermal generators with [Lorath-made fusion generators](#).

## Docking Airlock

The YSS Eucharis has an additional docking airlock on the port side that leads to the main (zero-gravity) passageway. It is visible on the ship's exterior. The dock has an extra-long, extending flexible docking tube with an automatically adjusting end connector that is able to connect to nearly any other ship's airlock.

## Wardroom

The Eucharis wardroom is divided into three sections: a lower level with two tables, a stairway to the lounge, and access to a bookroom; an upper level with the main table and buffet line; and the kitchen area, which contains food storage, preparation, and cooking areas.

The wardroom floor and tables are made of wood from [Hanako's World](#); many ships of this class have marble floors. The ceiling has various paintings, including several of [Yui](#) and [Hanako](#). There is also a window in the center of the ceiling—the only one on the ship.

### Bookroom

Protected behind airtight glass cabinet doors, Hanako's collection of books is constantly growing in both subjects and volume.

### Galley

The galley has an [Emfratec Cooking Technology](#) (Galley Master size) in addition to its standard equipment.

### Utensils

The Eucharis' has an interesting set of kitchen utensils. The ornate tableware is made of pure [Platinum](#) while the plates are black ceramic with a Platinum ring around their edges. Stoves use flames fed from an onboard supply of [Methane](#) created by the ship's recycling processes.

### Walls

Hidden behind thick red velvet curtains, the port and starboard walls have been lined with a recessed multi-layer hydroponics system used to grow 🥬 [spinach](#), 🍅 [tomatoes](#), 🌿 [basil](#), and other herbs and vegetables. This helps the ship maintain a supply of quality ingredients when away from ports.

Near the entrance to the main passageway, other items on the wall include:

- A plaque with the [Star Army Creed](#).
- A bulletin board with:
  - A printed copy of the [Star Army Regulations](#)
  - A printed copy of the [Rules of the Ship](#)
  - The daily schedule and training plan
  - Various reports, safety warnings, and notes

## Medical Center and Laboratory

Recently the Eucharis's [Sakura-type Medical Laboratory](#) was upgraded with a [Medical Scanner Charging Station](#) to support the [Portable Medical Scanner PMS-1M](#).

## Recreation Area

Hanako had two [Automated Massage Units](#) added to the recreation area.

## Systems

### Computer and AI

The Eucharis has a special, heavily upgraded MEGAMI system, named **Charisma**. The AI was originally that of the [YSS Sakura](#). Charisma is more powerful than other computers in her class and specializes in infiltration of other high-level computer systems. Hanako, having an exceptional grasp of computers, has put her expertise into Charisma; working together they are unstoppable.

In case of emergency, Hanako's station on the bridge has a hard reset switch for the computer.

### Defenses

The YSS Eucharis' shield systems have been fortified to provide increased protection against subspace detonator-type weaponry; they can also act as a [Mass Mesher](#). The ship's artificial gravity systems have been enhanced to better protect against scalar waves in the event of shield failure.

In mid [YE 30](#), the crew equipped Eucharis with the first [Entropy's Shroud Electronic Warfare Suite](#) to be used on a Yamataian starship, but this was later replaced with the more effective [Type 31 Electronic Warfare Suite](#) when it became available.

Eucharis's crew outfitted the ship with a system of array capable of creating three dimensional images. This *Volumetric Projection Array* can create the illusion of various starships or empty space. The projector has a range of up to thirty million kilometers (1/5th of an AU). The images are massless and sensors will not pick up a reading for the created objects.

## Environmental Systems

The *Eucharis* has robust redundant environmental systems augmented by additional parts and installation kits acquired on the public markets. The Eucharis is also equipped with a water filtering system for water landings and a Hydrogen/Oxygen Distiller (just add water!).

## Hull

The Eucharis has [Ketsurui Clan](#) colors on its hull.

## Propulsion

Eucharis has two large, extra sublight engines.

## Sensor Systems

The Eucharis is equipped with additional sensor systems, including: [Quantum Mirrors](#) set as trim around the dorsal and ventral edges and coated high-quality transparent Durandium covers. The Quantum Mirrors are also built into the forward sensor dish; [Lorath-made sensors](#) (Hyperspace and Subspace Monitoring, Quantum Sensors and Dimensional Sensors); a telepathic activity scanner; and weather monitoring equipment.

## Towing Support

The Eucharis has a special attachment point at the aft of the ship that is designed to tow additional modules such as cargo pods and sensor arrays. On exploration missions, the Eucharis typically carries an [Orbital Geological Survey Platform](#).

## Weapons

Eucharis is more heavily armed than standard Plumeria gunships.

The standard Plumeria-class carries the following weaponry:

- 1 [Ke-S3-W3020 Main Weapon Array](#) (Tiers 13 through 15, Light Anti-Capital Ship through Heavy Anti-Capital Ship (: Staff needs to determine which))
- 2 [Ke-S3-W2901 Positron Accelerator Cannons](#) (1 per pylon; Tier 12, Heavy Anti-Starship)
- 1 [KFY Graviton Beam Projector](#) on the ship's ventral stern.
- 2 torpedoes on underbelly hard points (typically [Ke-Z1 Series Anti-Starship Torpedoes](#))

Eucharis additionally mounts:

- 4 [Heavy Dual Anti-Starship Gun Turrets](#) (Tier 11, Medium Anti-Starship)
- 11 [Heavy Quad Anti-Mecha Cannons](#) (Tier 9 Heavy Anti-Mecha)

3. Eucharis, Starling, Nadeshiko, and Aurora destroy four enemy-controlled Sakura-class gunships.
4. Eucharis and Starling attempt to break through the outer line. Eucharis is successful. Nadeshiko and Aurora follow and assist Starling. A formation of three enemy ships of unknown type pursues the squadron and destroys Starling. Aurora takes very heavy damage and is adrift and burning.
5. Hanako manages to get control of the dormant ship fleet just before Aries Star Fortress self-destructs.

9. After evading NMX ships for an uncomfortably long time, the team returns and Hanako orders the depot fleet to self-destruct.
8. Eucharis returns to Yamatai for decontamination and repairs, during which the crew has shore leave for a day.
9. **MISSION 8:** Eucharis visits [Veritas](#) on a mission to safeguard VIPs. Taisa Hanako: "Star Army Intelligence and Star Army Command speculate that Veritas, in Elysian space, is the next major target of the Mishhuvurthyar, given the Mishhuvurthyar strategy of attacking shipyards and ship depots. These shipyards have information and persons that should not allowed to fall into enemy hands, including teleportation units and plans for high-end Elysian starships. Our mission is to quietly and stealthily beat the Mishhuvurthyar to Veritas, extract the VIPs, and plant charges on the shipyard computers that we detonate should the Mishhuvurthyar begin to win a battle there."

11. Eucharis pursues [NMX](#) and [Alitheia Fleet](#) to the battle at in the [Elysia Novus System](#).
  1. Upon arrival, the ship is targeted by a four-ship NMX escort squadron. With four ships against one, the situation quickly deteriorates and Eucharis takes significant damage. Fires and/or hull breaches occur on most of the front of the ship (Bridge, Captain's Suite, Engineering, Wardroom). Taisa Hanako evacuates to the recreation room and controls the ship via a VR station.
  2. NMX Commandos board the ship via a torpedo and one places explosive charges in engineering. After they detonate, the ship loses power and helm control. This commando then ejects in an escape pod. A second commando proceeds to the armor bay, steals a power armor, all Eucharis' teleporter units, and shuttle NG-X1-408-1 *Golden Apple*, leaving the ship without shuttles.
  3. Although thought dead after the ship's firefight, the VIPs were discovered safely hiding in a crew cabin.
12. [YSS Aeon](#) arrives to assist Eucharis and returns Eucharis to [its starbase](#) for repairs.

## YE 32

In Mission 9, Eucharis sent covert raiding teams aboard the enemy shipyard complex at [Sbuhfaba](#) in order to neutralize defenses before the Star Army's main attack force arrives. After they discovered prisoners and were detected by the NMX, things got deadly. The mission was a success, causing chaos prior to the fleet's arrival and the subsequent destruction of the shipyard complex. Eucharis teams managed to rescue ten prisoners and take one captive of their own. Eucharis then headed to [Elysia Novus](#) to recover and search the salvage.

1. **MISSION 9.1:** Eucharis travels to [Sbuhfaba](#), where it deploys covert raiding teams to board the enemy shipyard complex in order to neutralize defenses before the Star Army's main attack force arrives.

3. **MISSION 10:** Hanako accepts a mission from [Star Army Intelligence](#) to find and rescue any survivors from the [YSS Freedom](#).
4. As Hanako and crew head towards [HX-13](#), they collide with a cloaked NMX scout. After defeating the scout, the opportunistic crew captures a live transponder system and two enemy Nekoalkyrja technicians from the [NMX Scout](#) just before it self-destructs. Eucharis uses it and a volumetric disguise to impersonate the scout ship and enter NMX-controlled space.
5. After detecting a distress call, the Eucharis responds to a distress call by [SAINT](#) agent [Taii helen\\_klein](#) who is fleeing in a [shuttle](#) from a Lorath [Raptor-Class Expeditionary Ship](#) and a [Tivurthinth-class patrol ship](#); both are damaged from combat. *Eucharis* destroys the NMX ship and disguises herself as the [YSS Aeon](#). When the Lorath demand the agent's surrender, Eucharis retrieves the agent via power armor teleport and departs the area, but not before the Lorath discover the ship is actually the Eucharis. The Lorath then proceed to steal the agent's damaged shuttle, which self-destructs inside the Lorath ship. *Eucharis* continues her mission.
6. *Eucharis* enters the HX-13 system under disguise and enters the atmosphere of the jungle planet. Crew members are able to located the remains of the Freedom's pieces and its airdropped vehicles and Taisa Hanako orders formation of a search party. A hurricane is approaching the river delta near the crash site, complicating the rescue operation.
  1. [Rascoe Voe](#) dies when pushed from the ship without a parachute during deployment of the search party.
  2. 1 survivor ([Yaiba](#)) is found and and she provides a list of the 9 original *Freedom* survivors.

The ship's crew is represented by Ruxxles, "Lord Supreme Royal Commander of Emperors of the Rixxikor Collective."
