

Star Army Working Uniform, Type 31

The Type 31 Working Uniform is a discontinued uniform once used by the [Star Army of Yamatai](#) from [YE 31](#) to [YE 43](#). It is primarily associated with the [Second Mishhuvurthyar War](#).

History

The working uniform was introduced in the second half of YE 31 during the onset of the [Second Mishhuvurthyar War](#), replacing the [Star Army Female Bodysuit, Type 22](#). Designed for use on Star Army starships, the rugged new uniform is suitable for technicians, combat teams, starfighter pilots, and could be worn inside the [Mindy 3](#) or [Ke-M2-4 Series "Mindy" Armor](#). It was available in male and female versions and was the first uniform to be worn with [rank patches](#) instead of rank pins.

As of [YE 42](#), the working uniform was being phased out in favor of the [Star Army Duty Uniform, Type 42](#) and was removed from the [Star Army Standard Issue Items](#). In [YE 43](#), the Star Army announced that use of this uniform would be discontinued when [YE 44](#) began¹.

Design

The Type 31 Working Uniform consisted of dark tactical blue pants (with built in kneepads for ship maintenance work or field work), and a form-fitting dark blue shirt with the upper portion and shoulders clad in an [occupational uniform color](#) (the colored section has a sky blue lining). The Mandarin-style collar is dark blue. The uniform was worn with a police-style utility pistol belt ([Star Army Utility Belt, Type 32](#)), [boots](#), and [gloves](#). The belt, boots, and gloves were in blue-gray matching the belt and each other.
