

55 x 120 mm Aether-Slugs

The 55 x 120 mm Aether Slugs are little more than a [Zesuaium](#) tipped aether-capacitor¹⁾ wrapped in an aerodynamically designed shell of [Xiulurium](#)-coated [Durandium Alloy](#) to not immediately light up sensors and reveal the shooter's position. [Wyatt Fujiwara](#) was contacted by [Galactic Horizon](#) after his [Ke-M10-G4100 Long Life Power Cell](#) went into production, being both a marksman of some notoriety and a tinkerer he was more than happy to help the company design a new round for a new rifle he would no doubt get to use later down the line.

Stats

Some basic text about the stats, such as highlights, goes here.

- Damage Rating: Up to [Tier 9, Medium Anti-Mecha](#) Piercing damage with a [Tier 6, Medium Anti-Armour](#) payload regardless of piercing damage²⁾
- Size: 55 x 120mm
- Caliber: 55 x 120mm
- Damage Description: Initial impact by shell transfers the kinetic energy into the impacted entity as volatile Aethertic energy is spewed forwards, eating into the target much like an intense plasma would.
- Blast Diameter: 1 meter
- Effective Range: Projectile does not have its own source of propulsion, based on the weapon it is used in.
- Muzzle Velocity: Dependent on the weapon.
- Muzzle Blast: None.
- Recoil: Dependent on the weapon.
- Energy Source: Dependent on the weapon, designed for mass-driver systems.

OOO Notes

[SirSkully](#) created this article on 2019/06/13 14:56.

¹⁾

capacitor that stores raw aetheric energy

²⁾

piercing damage is dependent on how fast the round is being flung out the barrel, with higher piercing damage resulting in higher recoil felt by the user
