

# Ke-B5-W3906 Type 39 250mm Heavy Anti-Mecha Missile Rack

Designed exclusively for shipborne usage with the [Izanagi-Class Dreadnought](#), the Ke-B5-W3906 Type 39 250mm Heavy Anti-Mecha Missile Rack is the secondary anti-fighter and anti-mecha weapon system on the Izanagi-class. There are two-hundred and fifty of these missile racks on the hull of the Izanagi-class.

The missile racks have a three-dimensional square base (which is stored within the hull of the ship) and a rotating rack stand, the base and neck of which are made of [Zesuaium](#). When not in use, the missile racks are retracted within the hull of the ship and are covered with a zesuaium plate.
