

# Space and Orbital Offensive Warheads (SOOW) Mini-Missiles

While the MSAP Mini-Missiles are excellent weapons, they suffer from a lack of range in space battles. The SOOW missiles are identical in function to their smaller cousins, but are larger to accommodate more powerful drives. Invaluable in lightspeed combat, they nevertheless suffer in close-range battles when compared to the Mini-missiles due to the smaller ammunition reserves.

- Warhead: Ke-M2-W2908-SOOW Space and Orbital Offensive Warheads
- Purpose: The SOOW is designed to take out small hard and soft targets at long range.
- Damage: One missile is capable of destroying an enemy drone, gun turret, or small enemy mecha.
- Range: 1,000,000 miles at 0.75c
- Rate of Fire: Individually, or in volleys of 1, 2, 3, or 5 from each pod. Volleys can be combined
- Payload
  - *Shoulder Pod*: 15 SOOW Missiles each (maximum of 30 for two pods)
  - *Offensive Augmentation Pods*: 7 SOOW Missiles Each (maximum 14 for two pods)
