

Ke-T10-W4301 "Namikaze" Missile Launcher

The Ke-T10-W4301 “Namikaze” Missile Launcher is the dorsal mini-missile launcher system included on the [Ke-T10 "Fukuro" Multi-Role Shuttle](#) which became available in [YE 43](#).

About the "Namikaze" Missile Launcher

The “Namikaze” Missile Launcher is an evolution of the [Ke-T8-W3101 Mini-Missile Launcher Pod](#). It is integrated into the dorsal hull of the [Ke-T10 "Fukuro" Multi-Role Shuttle](#). “Namikaze (波風)” translates to “Wave Wind” in [Yamataigo \(邪馬台語\)](#). The launcher system is designed to be loaded by drop-in from above aft of the launcher assembly. The system is designed to deliver mini-missiles.

The system was designed at [Ketsurui Fleet Yards Starship System Testing Facility](#) at [Nemesis Bastion](#) specifically for the [Ke-T8-W3101 Mini-Missile Launcher Pod](#) in [YE 43](#). The design favored a hull-integrated design, because attachable pods are more easily targetted by enemy craft. It was also decided that the missile designed for the system would be a single design, compressed aether warhead missile that is guided with the assistance of the shuttle's [Compact Integrated Electronics System \(CIES\)](#).

Appearance

The Missile Launcher System is a multi-facet assembly integrated on the dorsal surface of the shuttle's hull.
