

Concordia Veil: Ship's Ledger

This page is for the tracking of the operational funds attached to the plot ship [Concordia Veil](#). Naturally, this is confidential information for the eyes of its owner, [Sienna Shelton](#), and should be treated as OOC information unless somehow made aware of it in the RP.

Pay Structure

Position	Average Share
Captain	n/a
First Mate	18%
Pilot	10%
Astrogator	10%
Medic	5%
Soldier	5%
Deck Hand	2%

The percentages listed are not solid figures, but rather serve as a guideline for payment of shares when the ship receives a payout or captures salvage. The captain can award bonuses on top of this amount for exceptional performance.

The captain, as the ship's owner, pulls from the ship's fund as necessary.

The medic and soldiers aboard the ship typically have the most variance in their shares, since their job is the most unpredictable. On a “blue milk run” with no armed resistance or casualties, their work load is very light, whereas situations where their skills are called upon will warrant a much larger payout.
