

SS Yugami

The SS Yugami is a [Geshrinari Light Freighter](#) that was obtained during the Salvage Operation of the [Kozan Class Heavy Mining Ship](#), a ship that belongs to the Nayacesen Family. [Takeyu Nayacesen](#) is the current owner of the ship, with it being in the possession of his company, [Nayacesen Industrials](#).

Unlike its stock variant, however, this ship has been given a light black coating - a testament to what it was originally used for. Takeyu had the ship recoated, to remove a skull and crossbones that was on top. A thin green strip was added to both sides of the ship, running along its length and then rounding around the two pylons. The name 'Nayacesen Industrials' is bolden on the side engines.

Mission

The SS Yugami's mission currently is to ferry refined ore from the Kozan to Pisces Station either to sell, or to go through further refinement to be sold to clients.
