

HX-5

HX-5 is one of the twenty systems charted by [Taisa Hanako](#) while she commanded the [YSS Elfin Princess](#) in [YE 30](#). It is an unusual system because it has two stars.

History

In [YE 32](#), [YSS Eucharis](#) placed an [Orbital Geological Survey Platform](#) in orbit of a habitable moon of the system's gas giant. This effectively served as a claim to the system and helps define Yamatai's southeast border (YSS Eucharis Mission 11).

After a rescue mission to [Mitsuya System](#) the heavily-damaged Eucharis stopped at HX-5 to recover (YSS Eucharis Mission 15).

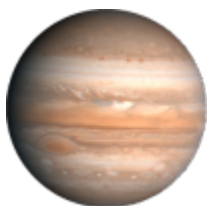

In [YE 42](#), something or someone attempted to board the survey platform and its anti-tampering detectors activated its self-destruct system¹⁾.
