

Jun

A star system in the [Great Southern Nebula](#), southwest of [Lor](#)'s former location.

It contains an M9 V Red Dwarf with a radius of 2.53×10^5 km and a mass of 4.49×10^{29} kg. Orbiting this star is:

1. 1 Gas Giant (like Jupiter) with .16 AU orbital radius and 1 terrestrial moon.
2. 1 Terrestrial World with a thin, breathable atmosphere and no water but 6% surface coverage with ice. 4 small moons.
3. 1 Rock Planet with planetary rings, trace atmosphere. 0.7G gravity.

History

The Jun system was colonized circa [YE 29^{1\)}](#).

In [YE 30^{2\)}](#), during the [First Mishhuvurthyar War](#), the [YSS Elfin Princess](#) fought the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#) in the Jun system and won.

In [YE 34](#), the [Star Army of Yamatai](#) constructed a [Frontier Starport](#) on the second planet.

In [YE 36](#), the [Yamatai Star Empire](#) placed a global communications networks of [Emrys Satellites](#) into orbit.

In [YE 37](#), after the [Second Mishhuvurthyar War](#) had ended, a raiding fleet from the [NMX](#) attacked the Jun system. [Orochi Squadron](#) and [Legion IX](#) defended it.

In [YE 38](#), [Trinary Star Shipping](#) opened parcel shipping centers in all of Jun's major cities.

In [YE 42](#), during the [Kuvexian War](#), Jun was attacked by the [Kuvexian Military](#) as part of the [Kuvexian Advance of YE 42^{3\)}](#). The 50,000 residents were evacuated and the system fell into Kuvexian hands.

In [YE 43](#), [Ketsurui Yui](#) ordered [Motoyoshi-Yamada Ayano](#) to liberate the Jun system⁴⁾. The liberation was successful, thanks to the efforts of the [First Expeditionary Fleet^{5\)}](#).

About Jun II

Jun II, the terrestrial world, is composed of 40.0% iron, 29.5% oxygen, 17.2% silicon, 6.2% titanium, 5.5% calcium, 1.3% other metals, and 0.3% other elements. Its atmosphere is 82.4% nitrogen, 17.6% oxygen, with other trace gases, and is 18% the pressure of Earth's. Temperatures on the surface run from -86 °C to 40 °C. The average is 21 °C

Mining Operations

The Jun system is the home of large-scale resource collection bases built by the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#). These are currently run by the [Star Army of Yamatai](#).

OOC Notes

The Jun system is named after [Doshii Jun](#).
