

Osman System

The Osman System is a star system to the west of the [Kikyo sector](#) and approximately 200 LY from [Yamatai Star System](#).

History

The star system shares the name of [Planet Osman](#), which was settled thousands of years ago by humans in a mostly failed colonization attempt.

By YE 36 the planet had regressed to a barely industrial society with many settlements scattered around the surface, usually near sources of water.

In [YE 38](#) [Uso](#) heard of the planet through her contacts. Having spent nearly all her money from her last job she decided to have a little fun and try her hand at world domination.

The system now is the main star system of [OSO](#), and has a growing modern city supporting its population.

Star Data

The star of the Backyard system is a type O star. Below are statistics for the star.

- Name: Sumter
- Type: G
- Mass: 1.7 stellar masses

Planetary Data

There are severeral planets in this system. Below is their statistical information.

Planetary Overview					
Order	Name	Type	Distance	Mass	Radius
1		Super Hot Rock			
2		Small Hot Rock			
3		Rock world			
4	Planet Osman	Sandy World	125.65 million km	4.77 to 24rd kg	6042.044 km
5		Large Cool & Gassy			
6		Massive Cold & Gassy			
7		Ice Cold!			

Planetary Overview					
Order	Name	Type	Distance	Mass	Radius
8		Actually just Ice			
9		Near 0k rock			

Osman

Planet Osman	
General Characteristics	
Gravity	0.8G
Population	1.5 Billion
Climate	Cool, Dry, and Sandy
Osman was an underdeveloped, largely ignored world on the edges of the Kyoto sector until Uso came along with her uplifting operation. The planet now serves as the capital for the organization.
