# Places Schema

Places is a new schema for star systems, planets, locations, and other Places characters can visit.

- place_name
- place_cat (multi for categories i.e. space station)
- place_opened (lookup Years Schema for dropdown)
- place_image (image)
- place_flag (image)
- place_faction
- parent_place
- place_pop (population number)
- place_grid (grid number on Kikyo Sector map for star systems)

Note: place_type was replaced by place_cat on 2/5/21
