

# Keem's Custom Gear

## Weapons

### Gladius (500 KS)

- Type: Short sword
- Length: 28" (70 cm)
- Mass: 3 lb. (1.36 kg)
- Components:
  - Durandium
  - Monomolecular Edge
  - Molecular Knit
- Description: This sword, though short, is very durable and overly sharp thanks to its durandium the metal that is surprisingly the same in make up to Durandium. It is capable of cutting and chopping but particularly good at stabbing. The handle is made up of tough wood wrapped in strands of a highly resilient plant found on the Pir'taplan homeworld. Along it's blade is stamped "Keem Ledat", though it is written in Pir'Taplan.

### Power Spear (960 KS)

- Type: Short spear, Long Spear
- Length: Short-3'4" (101.6 cm), Long-5'10" (180 cm)
- Mass: 5 lb. (2.26 kg)
- Components:
  - Durandium
  - Power Blade
  - Rechargeable Battery
- Description: The haft of this spear is made of Duraplast and is topped with a 1'2" (35.5 cm) Durandium spearhead. The spearhead itself has a thick base housing a power generator for the blade. When in its shortened state, two activation buttons are located near to the generator, one to operate the power blade and the other to transition the spear into it's longer configurations. The transition is automatic, the spear almost doubling in size.

## Armor

### Pir Helmet (295 KS)

- Type: Durandium Helmet
- Role: Head protection
- Mass: 4.5 lbs (2.04 kg)
- Components:

- 1 Exotic Fiber
- 2 Durandium
- Description: This heavy helmet is fashioned in the traditional gladiatorial fashion of Pir'tapla. It is mainly used to protect the wearer's forehead, ears and the crown of the head. The softer parts of the helmet are woven from a highly resilient plant found on the Pir'taplan homeworld. The metal is surprisingly the same in make up to Durandium.

### **Pir Breastplate (650 KS)**

- Type: Durandium Breasplate
- Role: Torso protection
- Mass: 10 lbs (4.53 kg)
- Components:
  - 4 Exotic Fiber
  - 4 Durandium
- Description: This heavy breastplate is fashioned in the traditional gladiatorial fashion of Pir'tapla. It only covers the torso and leaves the arms uncovered. It displays many scratches and rents upon the service. The softer parts of the breastplate are woven from a highly resilient plant found on the Pir'taplan homeworld. The metal is surprisingly the same in make up to Durandium.

### **Pir Greaves (355 KS)**

- Type: Durandium Boots
- Role: Shin and foot protection
- Mass: 5.5 lbs (2.49 kg)
- Components:
  - 3 Exotic Fiber
  - 2 Durandium
- Description: These heavy boots are fashioned in the traditional gladiatorial fashion of Pir'tapla. They are mainly used to protect the wearer's shins and to a lesser degree the foot and calf. The softer parts of the boots are woven from a highly resilient plant found on the Pir'taplan homeworld and provides excellent boot grip and flexibility. The metal is surprisingly the same in make up to Durandium.

### **Pir Skirt (355 KS)**

- Type: Durandium Skirt
- Role: Groin protection
- Mass: 5.5 lb (2.49 kg)
- Components:
  - 3 Exotic Fiber
  - 2 Durandium
- Description: This heavy skirt is fashioned in the traditional gladiatorial fashion of Pir'tapla. It is mainly used to protect the wearer's groin, hips and upper thighs. It provides coverage down to

about the middle of the thighs. The softer parts of the skirt are woven from a highly resilient plant found on the Pir'taplan homeworld. The metal is surprisingly the same in make up to Durandium.
