

IIS Fyrestorm

□ This article is a work in progress; It is currently not approved as canon.

The *Fyrestorm* is a militarised R&D [deconstructing outpost](#) created by [lemochi Innovations & Sales](#) orbiting the [previously Freespacer world](#), which sends excursions occasionally to the planet to retrieve whatever technology they can find for analysis. The station is equipped with some defenses but is not equipped for a large attack, acting essentially as a glorified field laboratory.
