## Physical Characteristics

- Height: 6'4" or 1.93 Meters
- Mass: 185 lbs
- Measurements:

**Build and Skin Color:** Vel is noticeably tall and lanky as well as having milk chocolate brown skin.

**Eyes and Facial Features:** Vel has oddly bright green eyes for his age which he used to keep covered to hide from others but over the years he started becoming proud of them as he believes that it shows his enlightenment over those of his age.

**Ears:** Of all his features Vel's ears and horns are the most plain and average nearly forgettable once people walk away.

**Hair Color and Style:** Semi-long silver and grey hair (Around 6 inches long) that he keeps neatly combed and out of the way which stays in place even during a run or while fighting.

**Distinguishing Features:** His looks are mostly normal with nothing besides his eyes standing out but his voice is a soft baritone that often pulls attention from its almost musical quality, though his normal voice is baritone he can easily reach high tenor and a very low bass

## Physiology Characteristics

**(Note: Any body systems not listed act exactly like they would do in humans.)**

## Unique Biological Factors

## Saturation-type

OWNED

Vel's uses these for the ability to access wireless communications system silently with his mind which utilizes local networks which he normally uses to track current ships that are docked to keep an eye out for his own people. Doing so requires his full concentration, most of the time requiring him to shut his eyes.

## Extend-Type

OWNED

He has a few of these including a neural feed/internal communications and a Wired BCI (Brain-computer interface)

## Coralian-type

Owned

Vel uses these primarily to create the tools he needs while working while

## Psychological Characteristics

**Personality:** Vel is a tinkerer. He sees machines and bio-machines as incomplete and is constantly trying to perfect the things around him and the equipment that is in use, Before manually changing things he comes up with designs on data-pads which he keeps in a neat stack where ever he is going to spend a lot of his time so that should the opportunity arise he can bring them up to whoever is in charge of the equipment. Unlike most of his people he see that there are some benefits to fighting that cannot be gotten from diplomacy and will not shy away from conflict and at times can be almost merciless about

doing what he sees as necessary if he thinks it will bring less harm than if things were left to continue on its own.

When not in potentially life threatening situations he is easy going about most things, except someone messing with something he was working on, he will often remain silent until he is used to the people that he is around speaking only when necessary. He is normally found smiling and working, listening to music and singing, or meditating for 2 hours a day, if interrupted once by someone he continues to be pleasant towards the person, but if it happens several times in a relatively short period of time he becomes quite unpleasant towards the person (emergency situations excluded) and until that person can understand the reason for his irritation and takes measures to change, his attitude towards said person will not change (though he will not jeopardize lives).

- **Likes:** Meditation, Tinkerering, Music
- **Dislikes:** Ignorance, Those that talk with no point, Those that interrupt his meditation
- **Goals:** To enlighten those that he comes in contact with and fulfill whatever task he is given by the captian (for now)

## History

### Family (or Creators)

Father was Kanois Vect'Orian (Deceased)

Mother was Jacanian Vect'Orian (Deceased)

### Pre-RP

For the early part of his life Vel was taught that Violence would never bring anything besides violence and that a peaceful solution should be the only answer but a fateful encounter with pirates which led to the death of 97 of his people including his parents destroyed everything he thought was true. He and the 2 other survivors joined the General Infantry the moment they got to the nearest planet that held a military base for their people. After completing his training he found his affinity towards the bio-power armor and switched specializations to mechanist to get even more familiar and close to them even using one in 2 separate combat situations but then years went by where he could do nothing but train and wait he tired of it and wanted the chance to make a real impact on the universe.

When he spoke to his superior about the possibility of a small group of people venturing out into the rest of the universe he was told that such a thing was impossible due to having to guard all sides against attack from the other known races, and if he kept pressing he would be dismissed from service and court marshaled. Seeing that his future would be limited to the planets he knew his whole life he tried to resign, but to no avail. His commander told him that court marshal was the only way he was getting out and then he would be imprisoned for the rest of his life, to that he exploded striking his commander repeatedly in the face until he was unconscious then left in quite a hurry barely getting off base before it was locked down and the search was on. Knowing his time was exceedingly limited he stole a small one man fighter heading to the edge of Iromakuanhe space. He sold it on the first back water planet he found

for transport out after hearing of a place where those that are hunted by different governments go to hid called Black Moon.

So here he waits hoping for his chance to find the adventure he was looking for while trying avoid those that still look for him.

## **Skills**

### **Fighting/Physical**

Vel has been extensively trained in both defensive and offensive hand-to-hand techniques as well as the use of several hand weapons, including knives, pistols, rifles, anti-tank weaponry and all types of explosives, including grenades. He should pass basic qualifications as a marksman with rifles at 150 meters and with pistols at 20 meters. He is in excellent physical form, with sufficiently high endurance to survive situations such as elevated G-forces and enough stamina for prolonged ground assaults. He also prefers Power Armor for most engagements if the time permits but functions perfectly well without it.

### **Leadership (Tactics)**

Vel has learned the essentials of tactics and command in high stress conditions, he is capable of giving and following tactical orders quickly and efficiently in the heat of the moment and can follow the command structure if necessary. He is capable of making use of the information given to him (tactical maps, target statistics, marked targets, etc) and finding relevant information to send to the rest of whatever group he is in. He is also well-versed in marine boarding tactics for ship-to-ship combat, as well as urban and guerrilla warfare for ground assaults. He has been in combat on board ships and planet side several times both on the offense and defense in each case, fighting off pirates who got the drop on them during a routine patrol which was followed by him leading a team to infiltrate the enemy ship while losing no one in his team, though 2 were wounded by lucky shots towards the end

### **Communications**

He knows the common trade language Nepleslian, military cant, and can use digital communications effectively.

### **Maintanance and Repair**

He also has an understanding of the technologies employed by the Astral Vanguard, and is well versed in the techniques behind their repairs. He understands the separate methods behind doing those repairs on both organoid and conventional technologies. He can spot certain obvious weaknesses on most craft, and find some others with a proper blueprint and time to study it.

## Engineering

He is very good at devising new ways of implementing old technologies to suit the current needs before missions and inside of combat. He can also retrofit older equipment with newer or more appropriate hardware should the situation demand it.
