

Mox Ketlalli

Mox Ketlalli is a [player character](#) played by [Orion](#).

Mox Ketlalli	
	
Species & Gender:	Iromakuanhe nonbinary female
Date of Birth:	AR 926 / YE 19
Organization:	Astral Vanguard
Occupation:	Frame Runner
Rank:	Vayshirin
Current Placement:	Setareh Wing

Physical Description

Mox is very nearly a law of [Ivuori](#) averages: they stand an utterly unexceptional 173 cm, weigh an utterly normal 63 kilograms, and boast a regulation slender build. Their hips are slightly wider than their waist, which runs roughly even with their bust. Their measurements, such that anyone should care, are approximately 86-68-71.

Their complexion, again common to [Ivuori](#), is rose pink, and smooth as butter. (Oh yes.) Mox has soft gray eyes, pale enough to be mistaken for white in the wrong lighting. Their hair is pale violet, slightly wavy, and cut in a short fringe: long enough to be pulled back when Mox is on duty, short enough not to reach their shoulders or be annoying.

Mox' horns are moderately longer than average, normally running to around 1.4 times of the length of their head. Mox routinely trims them down, both to shorten them and make them appear more squared than they are.

Personality

Mox is analytical, calm under pressure, intensely focused. They take great joy in knowledge for knowledges' own sake, and when they choose a new pursuit, they pursue it with fastidious devotion. Though soft-spoken and often withdrawn, Mox is quite sociable when the mood strikes them: they prefer to observe and listen before engaging, but find the experiences and perceptions of others to be among the most fascinating things in all the 'verse.

Though [Ivuori](#) through and through, Mox does have a deep-rooted adventurous streak, and one that pushed them, ultimately, to service in the [Astral Vanguard](#). The joy of discovery drives them, and Mox saw few greater opportunities to see new things - things few Iromakuanhe had ever seen before - than enlistment. When they retire from the service, Mox intends to travel as far afield as they can, and simply chronicle everything they encounter.

- Likes: space, quiet, reading, music, philosophy, [fieldball](#), bright colors, and you ;).
- Dislikes: Seuen, Pilli, personal conflict, stagnation, expectation.
- Goals: Join the Vanguard, see the [cluster](#), meet new life and new civilizations, jump their entry ports (!), chronicle the galaxy for posterity.

History

Amaksille “Mox” Ketlalli was born in [AR 926](#) / YE 23 in the month of [Ahni](#), the second child of Pilli Ketlalli and first child of Seuen Mehak. They have an older sister, Halaisa Ketlalli, though they've never known her very well: she was entering a research apprenticeship by the time Mox was old enough to speak.

Mox struggled with their identity and interests greatly as a child, finding little to keep their interest save a pathological need to conclude what they started, and finding the mix of open acceptance and profound detachment of their family to be extremely frustrating. It wasn't until their fourteenth year that Mox became particularly cognizant of their intention to leave. It wasn't that life in the enclave had ever been bad, per se, simply that Mox wanted to see... more. Out in the void, there existed worlds beyond counting, and Mox wished to see them all.

Thus, Vanguard.

Social Connections

Mox Ketlalli is connected to:

- Pilli Ketlalli (mother)
- Seuen Mehak (father)
- Halaisa Ketlalli (sister)

Skills Learned

Mox has the following notable skills:

- **Communications:** Mox is fluent in Saalrasi, as well as Haidasari, and able to effectively and efficiently communicate information under fire. They're wholly capable of making use of all standard communications found in the Commonwealth, including laser, radio and MASC-enhanced variations in various formats and media. Mox is also an evocative writer with a flair for the dramatic and a head full of fanfiction. Often in deeply dialectic Ivu'Saalrasi.
- **Fighting/Physical:** Mox is proficient in both defensive and offensive hand-to-hand techniques as well as the use of several hand weapons, including knives, pistols, rifles and light explosives such as grenades. They are in excellent physical form, with sufficiently high endurance to survive situations such as elevated G-forces.
- **Technology Operation:** Mox has had extensive courses in the use of NI systems aboard the Organoid-type Substructure craft employed by the Astral Vanguard, and understands how to properly utilize their own entry ports to interface with compatible systems. The use of standard-issue electronic devices and conventional computers have also been a part of their education.
- **Medical:** Mox is capable of basic medical techniques, including everything up to first aid, emergency care such as CPR or the Heimlich maneuver and the administering of preprepared medicine, such as painkillers or stimulants.
- **Vehicles:** Mox has advanced comprehension and practical ability in the piloting of a Powered Frame unit, able to fly in most conditions and capable of operating all of the onboard weaponry safely and efficiently in combat scenarios. They can make highly complex battlefield maneuvers while under high stress and adjust their movements to compensate for all logical combat variables, such as gravity, weapons fire, atmospheric conditions, and more. They understand the basic functionality of their machine and can make basic repairs to certain subsystems.
- **Leadership:** Mox has no formal instruction, but makes for a strong candidate for eventual officer training on at least some counts - they have a sharp eye for details in high-pressure situations, a good head for small-unit tactics, and a deep streak of cunning. They could certainly use work on the part where one applies those qualities to actually leading, of course...
- **Culinary:** Mox likes cooking. Mox also considers Mox to be very good at cooking. Mox did most of their own cooking from approximately when they were old enough to hold a spatula, and while entirely self-taught, they have developed excellent instincts for texture, flavor, and verisimilitude. Then they joined the Vanguard...
