Physical Description

Exia is 6'0" with snow white medium length hair done up into a pigtail to either side. She has an almost youthful expression across her soft, and very elegant face, framing crimson eyes. Like her mother and sisters, supports a DD cup size and a very pronounced hourglass figure. On her left cheek of her rear is the old S6 emblem tattooed on, a bar code with a clone batch unit ID gene modded into her skin like a tattoo.

Personality

Exia in a nutshell is kinda, seemingly innocent, youthful, and always cheery to an almost uncomfortable degree. The clone also seems detached from killing, given the original purpose her kind was created for. It's allowed her to even carry a smile through battles, which albeit has proven morale boosting for her allies, has lead to more then one occasion of the enemy being terrified. Despite her somewhat optimistic and cheery ways, the girl has an odd obsession with shotgun style weapons, but generally knows her way around most weapons she lays her hands on. Carefree, easy going, and just seeming to go with the flow, formal does not seem to be a word in the clone's vocabulary. Most of the time she is found clinging to, or hanging around someone, most of the time her family. Otherwise she's working on equipment, most likely some newly bought shotgun she's added to her rather large hoard of them.

History

In [YE 24](#), Exia was created as a mass produce-able clone soldier. Exia eventually tossed aside this name for one more her style, just like her most notable batch sisters and brothers, who were originally destined to be used as a expendable soldier before their liberation. But events were put in motion that saw the products shelved in cryogenic sleep, the data being used else where to create even worse products once [Psychopomp LLC](#) absorbed the research group into the company. For 17 years, Exia and her many beloved siblings slept, fated to be forgotten, but the prototype rose against the wishes of their masters when they were eventually liberated. However, even with her new freedom, even after a year, she has no idea what to do with herself. Having taking collecting shotguns as an eccentric hobby, she more or less cheerfully goes with the flow to see what opportunities come along, even as more and more of her siblings learn to be functioning individuals.
