Personality

History

Vaishnavi Pai was born in 33日 2 月 [YE 21](#). Like many young Neplesians, her youth was heavily shaped by constant inter-faction fighting as well as the occasional interstellar invasion. Her parents' example of love and trust inspired her to excel and forms strong bonds with the people around her. Her greatest fear is finding out that the next marine in the stack doesn't think he can put his life in her hands the way her parents did for each other for decades.

Descriptions

- **Optical Implants from [Claymere Cybernetics Unlimited](#)** - The eye are replaced with a cybernetic equivalent. The iris can be customized to be whatever color the user desires. It is sturdier than the original and will prevent the chance of diseases so long as it is properly maintained. Calibrations are necessary every few months to ensure accuracy. The basic model gives the user perfect 20/20 vision for as long as the system continues to function.
 - **flash compensation** - Allows the user to not be blinded from flash bombs, large explosions, and other high intensity light sources.
- **Two entire leg prosthetics** - The entire leg is replaced with a cybernetic prosthetic. It can be sheathed with a natural looking synthetic skin cover to hide it is true nature or it can be of metallic appearance. Unenhanced cybernetic legs provide light higher defense against blunt, bladed, and ballistic weapons and are capable of causing slightly more damage to unarmored humanoids. The safety calibrations to ensure the leg functions at 'normal' human strength levels can be switched on or off if the user prefers. The same goes for the 'pain' sensors that warn the user of damage to the limb. Enhanced cybernetic legs have more strength but may be harder to conceal depending on the amount of enhancement requested.
 - **increased strength** - Not recommended unless getting both legs replaced. Stronger kicking and higher jumping is possible.
