**Likes:** Adrenalin, beer, being busy. **Dislikes:** Uptightness, hater, bullies. **Goals:** Her parents thinks she is a good for nothing. She would like to prove otherwise.

## History

### Family (or Creators)

Karl Ritter - father, 25 AY Maria Ritter - mother, 23 AY Brunhilde Ritter - sister, 13 AY Anne-Marie Ritter - sister, 9 AY Johann Ritter - brother, 6 AY Martin Ritter - brother, 3 AY

### Pre-RP

Viki was born on Abwehr to an uptight family. Father was a politician, mother was a successful businesswoman. Even though she was born into money she was not very happy. Her parents even though they weren't home most of time have set a lot of rules for their children to follow. Nannies of the children had to make sure the rules will be followed precisely.

Parents wanted their wishes to be done. They thought they knew what is best for their children and acted upon it. Viki's older sister always listened to her parents but Viki was more rebellious. She was always trying to find the ways to bend the rules and wishes of her parent or carrying them out in her own way. Making her parents anger became kind of hobby for her.

Parents were very conservative and Viki found that too suffocating and boring. During her adolescence

she started doing sports and mainly dangerous sport like fencing, martial arts, climbing and even swimming just to tick her parents off. Her first lover was another girl because she knew it would make especially her father furious. His views of homosexuality were ancient.

At high school she chose military lore although she had no intention to join military afterwards. Her parents didn't know that though and threw her out of house just after she finished school. They were extremely against violence and wouldn't suffer their daughter as a soldier. Only family members she still likes and is in contact with was her younger sister, and since he was born and grew up her youngest brother.

Being kicked out rather surprised Viki, but she got over it quickly as did with most things. She shortly thought about joining army when she found out about larger mercenary organization hiring. The organization even offered trainings to new people. Viki quickly joined and was with company for years. It specialized mainly on pirate hunt, protection and hostage situations. Over the years Viktoria saw many things and got through some nasty experiences.

Life was good but something happened and the company disbanded. It looked like someone new acquired most of its shares and decided to sell them. With her mercenary life over she tried to go back home. Make up with her parents. Unfortunately her parents didn't like the idea very much. After another long argument Viki left for good. She packed her stuff and left Abwehr for good to make new life outside.

First she tried Nepleslia where she got around as a bounty hunter first. But with almost no detective skills she could catch only targets that actually weren't hiding. She found that line of work not-suitable for her and left it. For a while she tried to work in a bar to get new experience, but she was kicked out after breaking the arm of touchy-feely customer.

After the failure that Nepleslia was she left for Yamatai space. First thing that got her eyes was Origin Industries. Maybe her luck will lie there.

Viki was allowed to join Origin security and was soon inserted into special test ship named OIF Atuan as a test pilot. She was supposed to learn to pilot Origin Frames, who were supposed to be used easily even when in hands of inexperienced person. Viki also met the rest of the team filled with interesting individuals like very hot and intelligent team leader Kelly, comm specialist Mark, loud-mouth mercenary named Lucien, actual neko borrowed by Origin from SAoY named Taela and ex-neko Yoshiko. There were even more like explosion loving yamataian Shinji and calm and collected nepleslian girl named Meena.

Arah Tenner, the ship's captain was very strange person and unlike anyone other Viki ever met. She was very calm and seems withdrawn from matters of mere mortals under her command. Soon after joining the team went on its first mission to retrieve some information from some of Kelly's contacts. Things went wrong though when they got ambushed by criminals that stole the mechas before. Team engaged in combat with several heavy mechas and large number of Demon armours, not to mention enemy ship.

Team luckily defeated these without losing any of its member, although Yoshiko almost lost her life when several Demons got inside Atuan. Atuan itself got heavily damaged but luckily survived the encounter with help of suddenly appearing merchant vessel of unknown origin.

Team returned to Dawn station after this mission to get some free time while they waited for new Atuan. After getting scolded by one of the Origin CEO even though past events were not in their hands, they gave him a finger in their minds and went to get drunk. And they got drunk. Yoshiko managed to drink

herself towards sleep and few other team members had a lot to drink too.

But something strange happened when Yoshiko stumbled into strange car when she awoke and car drove off with her. Ged the Atuan AI immediatly got two cars for the team and high-speed chase trough Dawn station began. It went for some time and luckily stopped in time, just after Viki jumpd from speeding car into remotely controlled mecha to stop the car. Team then got to know that this chase was fabricated by Origin employees and captain Arah knew of it. Viki did not really got to know what was goin on, but it was some talk about AIs. What made her mad was when she got to know that construcion mecha that was stolen for her gave a construction worker hear attack when it flew away on its own.

## **Skills**

### **Physical**

Viki loves adrenalin and it means sports. She loves to climb, swim and even run. She is fast runner. She knows a think or two about acrobatics and athletics. She is as goos swimmer as Abwehran can be. Of course she needs flotation device to actually swim.

### **Fighting:**

Viktoria is very skilled fencer. She is also trained hand-to-hand combatant. Her mercenary training and life got that skills even higher. She also learned a lot about a long range weapons. She is skilled marks-woman and knows well how to shoot. She also knows how to use PA. Although her use of it is rather amateurish as she has only theoretical knowledge and sat in it only once or twice.

### **Entertainment**

Viki likes to play bass guitar and play it pretty well too. She likes to jam whenever she can, but it is hard to find other players. She know how to dance and is average singer who can sing pretty high for an amateur. She is also pretty experienced and good in bed.

### **Communication**

Except for Abwehran as her native language she speak well in trade. She also know some Nepleslian and Yamataian but her skills in these are rather low and she speaks slowly and not really well. She trained in using radio and communication devices. Knows few things about frequencies and jamming.

### **Vehicles**

Viki is average driver. She know how to drive most cars. On the other hand during her mercenary years

she managed to learn how to drive tank and use its weaponry from a friend at merc company. She knows how to use it but has low experience with it. Other than that she knows how to ride a motorcycle well. She has a little to no knowledge about mecha but finds them tempting.

Maintenance and repair

Viki is average gunsmith and know how to hand weapons and take care of them. She also gained some technology knowledge during her times with company. She know a few things about electronics, circuit and other similar stuff. She know how to weld.

Starship Operation (Fighter)

Viki learned how to fly at merc school. At first it would actually looked that she will be a pilot before changing to infantry. Flying is another adrenalin things she got into. She like to fly fast and low. She know how to pilot smaller crafts like fighter, gunship or small freighter. And even though she does not know much about dog-fighting she is pretty good pilot and can fly safely through hazardous places like asteroid-fields.
