Physical Characteristics

Height: 4' 10" Mass: 100 lbs. Measurements: 30A/23/33 Bra Size: 30A

Build and Skin Colour: Petite in all things, Orie could easily pass for a Geshrin or Nepleslian child if not for her ears... a fact that she often revels in, since her small size makes her adept at getting into all of the nooks and crannies in engineering decks. Her skin naturally has a tan tone.

Facial Features and Eye Color: Orie's face carries the Asian features common to most nekos. Her high cheekbones and thin eyebrows give her an almost elfin appearance.

Hair Color and Style: She has shoulder-length dark green hair, very slightly curly and frizzy enough that it tends to defy all attempts at combing it. There is almost always a handful of strands dangling in her face, despite her best attempts to the contrary.

Distinguishing Features: She almost always has at least one 'tattoo' of some sorts, thanks to her holographic projection system... and she usually has several of them. They range from simple words to full-body panoramas, depending on her mood, and she usually changes her line-up daily.

Psychological Characteristics

Personality: Earnestly hard-working, thoroughly respectful of her superiors, loyal, and creative, anybody who only briefly met Orie could come away with the impression that she is a perfect worker. To her detriment, though, she's guileless, trusting to a fault, easily distracted, has a tendency to wild flights of imagination, and is prone to giving people the feeling that she's a bit slow. In all actuality, she's quite

intelligent, especially when it comes to mechanical problems... but between her mind wandering off and things distracting her, even a simple task can take her an hour on a bad day. It doesn't help that her body and mouth tend to get ahead of her mind, especially when she's in a hurry. She also seems to have no concept that something can be inappropriate or odd to talk about, so she has no compunctions about asking her companions personal questions or telling them about her latest fantasy. Fortunately, she's recently found an outlet for her imagination through art, both in her tattoos and paintings.

Likes: Painting, puns, working with her hands, good listeners, her tools, being short, inventing (or, at least, trying to). **Dislikes:** Chewy food, being teased, her hair, fighting. **Goals:** To become a famous painter. Or a famous inventor. Or a famous tattoo artist. She really isn't picky.

History

As a recently-born neko, Orie has little history to speak of other than her basic training. She was, at one point, assessed to see if her odd behavior was the result of psychological issues. Nothing came of this, other than the psychologist's assertion that Orie was fine, if slightly eccentric.

Skills

Fighting: Orie is fully trained in armed and unarmed combat in and out of power armors. Due to her technical sentry training, her specialties lie in close-quarters fighting, incapacitating techniques, and ambushes.

Communication: Orie is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. She's fluent in English and Japanese, and can communicate through encrypted telepathy. She can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.

Technology Operation: Orie is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships. She is proficient in entering and/or searching for information.

Mathematics: She received basic mathematics training, to including up to algebra and trigonometry.

Maintenance and Repair: Orie has a natural knack for repairing most simple items, and she's trained in repair of all common Yamataian starship systems. She isn't a prodigy by any means, but she's competent enough to pull her own weight.

Art and Vocations (painting, tattoo design): What she lacks in formal training in the arts, she more than makes up for with imagination and determination. Her paintings tend to be a bit crude and cartoonish, in accordance with her lack of technical skill.

Engineering: Her knowledge of how to fix things is just as easily applied to making new ones. Most of her ideas for things she'd like to build are either bizarre, unnecessary, or both. Fortunately, she has yet to ever get together the parts to build one of her ideas.
