- 3. n/a

Physical Characteristics

- Height: 5'1"
- Mass: 93lb
- Measurements: 34A-24-33

Build and Skin Color: a pale tan skin color, with a slight build even for Nekovalkyrjains, generally rather petite.

Eyes and Facial Features: She has deep red crimson for eyes, a small nose, and somewhat thin lips.

Ears: She has short furred ears, with small stripes of gray in the white fur.

Hair Color and Style: her preferred hair style is a short pixie cut with her white hair, that flairs out and barely reaches her shoulders.

Distinguishing Features: her deep red eyes are her most striking feature, followed quickly by one of them being slightly off color, with a slight golden ring around the left one, but it is unnoticeable if you aren't looking for it or haven't noticed it previously.

Psychological Characteristics

Personality: She is a bit timid and not sure she is up for being a soldier, but she is willing to give it a try. She is a bit snarky sometimes, and uses it as a coping mechanism for when things look like they start to go bad, but after a bit she may start to break down, and be unable to complete any real orders when the situation goes from bad to worse. She is almost unable to take most forms of teasing, reacting with whatever she feels is appropriate for the scenario. She's probably stay a bit quieter about it if it was a superior officer though.

Likes: most kinds of music other than techno, and singing, and enjoys the emptiness and calmness of space.

Dislikes: people commenting on her cupsize, being truly alone, ghost stories, and most forms of teasing, but can tolerate it. She can't stand the thought of people she knows dying before their 'time'.

Goals: figure out what her lot in life is, depending on how these first assignments go, she may decide a military career is the way to go, but isn't sure that she wants to go around killing people, or getting killed, but she almost certainly wants to do a lot of space traveling whether it's with the military or not.

History

Creator

Freyja was made by the [Ketsurui Zaibatsu](#).

Pre-RP

Freyja was created on [Yamatai \(Planet\)](#), where she underwent standard [Star Army of Yamatai training](#) with no issues. Before being shipped out, during a basic training exercise in which she was acting as a POW, she discovered a knack for lockpicking, stealth, and 'being Houdini incarnate'. She had requested doing training revolving around escape, lock picking, and sleight of hand should she and her squad ever be captured, giving them an edge. But during her training, she had been (lightly) teased about her figure in general, and became a bit withdrawn from it, even though it was all in good fun for the others, who didn't really mean it, she couldn't take the teasing very easily despite herself even when knowing they meant nothing by it, which extended to ghost stories, which genuinely freaked her out when a couple of fellow trainees found some obscure ghost stories and decided to spook the other recruits, and has decided ever since that ghost stories were the worst thing ever. Shortly after being shipped out she was one of the first to see the endless expanse of space, and absolutely loved it. Whatever she does after this, it will almost have to involve space travel. Even after a month of hanging out with her fellow trainees, she still fails to remember some of their names by the end of it all. Now, ready to be shipped out, she awaits her first assignment.

Skills

Combat

- She had extensive training in hand to hand combat, proving to be a natural in most scenarios ranging from zero gravity to heavy weight planets, and a natural with longer ranged weaponry like snipers, however ranges in between those two prove a bit more difficult for her.

Communication

- Like all soldiers in the star army, she was trained to operate a two way radio, report intelligence, and request for medical assistance should it be necessary.

Equipment

- Freyja was trained maintain a neko- service pistol, the multi species armor type 28, and to operate a Daisy M6 Infantry Power Armor, Mindy M2 Power Armor suits, Type 30 Light Utility Trucks, and Type 30 Surface Terrain Vehicles.

Emergency

- She was also trained in the basics of being able to put out shipboard fires, and damage control in

the area during her basic training.

Medical

- The curriculum requirement at her time of basic training taught her the art of dressing wounds, evaluating injuries, and the basics in keeping one from dying for a bit longer, along with knowing when to call in for medical assistance.

Security

- She had POW training, which was made all the more effective by her advanced training in subterfuge after basic.

Rogue

- she quickly discovered a natural talent for sleight of hand, general stealth, and generally being a natural Houdini. This led to her requesting advance training in these fields for a few months before being shipped out to her first assignment. Quickly proving to be a fast learner, this advanced training led to her being able to move in trafficked areas unnoticed, able to steal most items off of one's person, and advanced lock picking, extending to her ability to fool electronic and magnetic locks through a variety of tricks.
