History

Pre-RP

Natsuko was created by the Ketsuri Zaibutsu as a tool to be used in the war against the Misshu. Natsuko's first deployment was aboard a Yui-class scout ship which was destroyed, 3 months after her arrival, during an engagement with a Misshu ship. Luckily the Misshu ship was destroyed as well, but Natsuko and what remained of the original armor wing of her ship were left adrift. Several hours after the battle, the wing was recovered by a SAoY vessel that was passing nearby. For the next six months Natsuko was shuffled around different ships multiple times.

Service Record

17th Kasairyuu Armor Wing

After spending six months being shuffled around the 5th Expeditionary Fleet, Natsuko was assigned to the 17th Kasairyuu Power Armor Wing.

When it rains, it pours

When Central Yamatai ordered the 5th XF to launch an all out offensive on [Bizankro](#), the 5XF brought

their issues back to Yamatai. Projections were that not only would the 5XF lose, they would lose badly. Even favorable odds had more than a 60% loss of life. Yet the order remained. The 17th boarded the YSS Akuro III expecting to unload into certain doom. In the end though the Akuro III passed right through Bizankro and went straight to central Yamatai. Upon their arrival the 17th was ordered to launch and form a defensive gaurd around the ship. It was then Natsuko lost faith in herself, unsure of whether or not she could shoot her sisters Natsuko prayed that nothing would forcer her to choose between them and her new family among the 17th. Luckily the event was quickly resolved without a shot being fired, and miraculously the leadership of the Yamataian Star Empire changed hands to the Motoyoshi.

TDRT Mission 1: Hostage Sitation in District 26

A group of angry Nepleslians and ID-SOLs took several hostages in an attempt for revenge. The building was stormed by the 17th Kasairyuu and the hostages were secured.

UOC Changover

After the TDRT mission the 5th XF declared it's intention to secede, when the members of the 17th were returning to orbit they were informed of the changeover. Natsuko opted to stay with the newly formed United Outer Colonies, unknowingly pulling Xanatos along with her. The 17th was then stationed shortly aboard the YSS Akuro III now rechristened the [The Akuro III](#). The group only spent a short amount of time aboard the ship, just long enough to be issued the new basic kit and turn in their old standard issue equipment and uniforms from the Star Empire of Yamatai. They also returned their power armors and were issued [Tenshi no Yoru 'Tenshi' Light Mechanized Power Armor](#) power armors. Natsuko was also given a promotion, to the new rank of Peacekeeper 2nd Class. Natsuko wandered around with Ai and Xanatos after having discovered that Galar had decided to remain in Yamatai, they ended up in the Armor bay where the new Tenshi armors were parked. As they entered Natsuko spotted someone disassembling one of the armors, and promptly addressed her concern directly. Unbeknownst to her however, this person was a new engineer to the group, [Jason Starlock](#). While Natsuko barraged the helpless recruit she noticed Ai was looking rather upset and speaking to Xanatos. Unknown to Natsuko the root of Ai's sadness was that Galar had left, not something that Xanatos had said or done. Without pause Natsuko rushed over and rushed to help her friend. As the two were talking the truth behind Ai's sadness became clear just as they received a message with new orders. The new orders contained a new rank, Cadet. The orders sent them to a shuttle docked in the multifunction bay where they would be taken to their new assignment. [Chouteisha Squadron](#).

Chouteisha Squadron

After being assigned to Chouteisha, a flurry of activity hit Natsuko in the face. Xanatos, Natsuko's lover, was immediately re-assigned during the mission briefing to a different post. It felt for Natsuko as if he were ripped out of her life. Shortly thereafter, there was a miscommunication between the commanders of Chouteisha Sqaudron and the group was pulled off of their ships. After a short flight the team deployed in order to protect the transports. That's when everything went wrong. As the squadron deployed it was attacked by unknown enemy forces using anti-aircraft weapondry. The squadron eventually managed to

land, and with the aid of Venura, sent down to assist and supply the squad, they were eventually able to take out the anti-aircraft weapons and hold out for support. In the months that followed, Natsuko recovered then began to attend Shambhai Leadership Academy in order to complete her training as an officer. Following graduation, Natsuko was assigned to the [UCS Zenpyou](#).

Task Force Inquisition

She joined the SAOY after a convoluted process too complex to put into words concisely because she felt that the UOC was no longer the place for her. She was then transferred to the YSS Shinigami which was later positioned inside [Task Force Inquisition](#), at which point she had progressed to Away Team Leader.

YSS Wyvern

After Task Force Inquisition's activity died down and many Nekos were beginning to move into the reserves, Natsuko was given the choice to undertake MP training at Fort Hikari, or be placed in reserves. She chose to complete the training and was shortly thereafter assigned to the YSS Wyvern.

OOC Notes

Because Natsuko hasn't changed bodies ICly I haven't changed her species yet, once this occurs I will update the bio as soon as I can (or as soon as I remember to do so). Also, when she changes she will change to a Neko look-alike body. I.e. she'll still have 3 fingers and cat ears (and presumably, the same toes as a neko as well).
