Personality

Likes: Playing music, she plays the guitar. Reading books. Quite research. Coming up with new tech gadgets and cybernetics with her sister.. Loves her sister, even though she gets teased by her a lot, and her parents. Dislikes: Being picket on. Fighting.

Hotaru is very quite and even a little bit timid. She's very affectional to her friends and family. She really doesn't like fighting, although she is very skilled at it. She is fiercely loyal to her friends, and will do anything to protect them even if it means fighting.

History

Hotaru was born 30日 4月 44 in [YSS Wakaba](#). Hotaru and her twin sister Ryoko were born under quite extraordinary circumstances. Their parents were aboard the YSS Wakaba when it went missing. Through some space anomaly, the ship had been transported many sectors away from their homeland. After several months of fighting just to survive, and help supplement their rapidly dwindling crew, the crew were given special permission to increase their numbers naturally.

But for Ryoko and Hotaru's parents were a bit different. Their father was the Captain and their mother was the senior Joto Heisho and leader of the famous Angels of Death. Although their 'childhood' was quite short, they were very much loved by both their parents.

Hotaru is the younger of the two, by a full five minuets. She is also smaller than her sister in both size and personality, favoring her mother more than her father. She is very quite and enjoys spending hours either doing research or playing music.

Hotaru is a science specialist speciating in Biological Sciences especially genetics and cybernetics. In fact, at just 3 months, she designed and with the help of her sister, built her father a cybernetic leg replacement.

Skills Learned

Hotaru possesses all the basic skills of a trained neko. Although they are far from basic in the fighting area. Having a mother who has been trained by Rangers, Giretsu and even samurai and who passed those skills on to her daughter has given her advanced skills in combat.

She also contains science skills speciating in Biological Sciences especially genetics and cybernetics.
