Psychological Characteristics

Personality: Overall she is a kind person, always showing a kind, smiling face even if she feels otherwise. She tends to be quiet and reserved, particularly in groups or around authority, but likes chatting with individuals. Though she acts fairly outgoing for the most part, she considers herself more introverted, often thinking and over-thinking in internal dialogs. Despite being a little shy, she tends to wear tight clothing that accents her figure, particularly around others, due in part to the uniforms worn by all in the service. In private she will often wear pajama-like clothing for comfort, or even just holographically

projected clothing. She takes pride in her appearance, her long hair in particular, sometimes spending long periods of time brushing it out until it's silky smooth. She rather enjoys following orders, and will do her best to carry out any commands fully. Unsure of herself in making decisions, she will often divert to others for advice, rather than the possibility of making a mistake. She feels a little unsure of her role as a weapon, and would like to develop herself more as a person if she can. Also, she will tend to purr when pleased.

- Likes: Playing Games, Reading, Drawing, Plush Toys.
- Dislikes: Making decisions, sudden changes.
- Goals: Doing her duty.

History

'Born' on a Star Army starship, her only history thus far basically consists of the normal programming and training for Nekoalkyrja.

During her training she demonstrated an above average proficiency in her agility in zero-gravity, and it was suggested to her that she should become a Powered armor pilot. At the time she had not made up her mind, and so went into training for powered armor. Later having second thoughts, feeling a little unsure of herself since she has not yet seen combat, thinking that she might be better suited to being a Technical Sentry or other, more passive job.

Skills

Communication: She is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. She is fluent in English and Japanese. She can speak and write both correctly and efficiently, though sometimes a little slow to speak, as she puts her ideas into words, particularly in Japanese. She has the basic skill to write reports and fill forms. As a Nekoalkyrja, she has the natural skill to communicate telepathically.

Fighting: She has been programmed in hand-to-hand combat training, followed up with a rigorous training program. She is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons. She was programmed to be proficient in powered armor, knives, energy pistols, grenade and energy rifles, though she does not have much hands-on experience.

Technology Operation: She is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships, easily and efficiently. She is proficient in entering and/or searching for information, as well as other functions.

Mathematics: She received little more than the basic mathematics programming, including up to algebra and trigonometry. She often displays intuitive skill in solving simple problems quickly.

Art and Vocations: She exhibits something of a natural talent when it comes to art, sketching drawing on paper usually, though she has been experimenting with holographical projected art. Most of her drawing done from a model or idea, rather than creative works, though she doesn't consider any of them good

enough to show to others right now. Most of her sketches tend towards an 'Anime' style artwork.

Entertainment: She enjoys music, and tends to hum or sing along with most songs she listens to, though she would feel a bit embarrassed singing in front of others. She also has the typical Nekovalkyrja mindset towards sex, 'for moral reasons', though she is still technically a virgin at this point.

Rogue: Part of her training as a stealth-type Nekovalkyrja included the ability to move about without detection, which she employs rather successfully whenever she wants to be alone. Though she wouldn't consider it 'seduction' persay, nor does she even consciously employ it at times, the way she empathizes with people in a communication can sometimes sway how they're thinking.
