## Mental Characteristics

### Personality

Somewhat of an introvert, Ruri usually does not care about much of the goings on around her, nor the people. She constantly seeks things that interest her and stave off a deep ingrained sense of boredom she's had for all her life. By far Ruri isn't easy to befriend as she has as of yet to even make one. Instead she prefers to spend her time alone, quietly reading, or playing video games that provide some sort of challenge to her reasoning skills. When thrust into social situations she is unable to escape from, Ruri usually becomes quite shy, unable to cope with the 'stresses' that come with talking to people. That or she becomes cranky and snappy as a means of both coping and to create a way for her to escape the situation. Usually one of the only ways to get her to open up, or rather even speak to someone with some modicum of kindness is to tempt her with sweets, which works even better if they could pair it with citrus flavors.

Sena Kurusu	Twin Sister <sup>2)</sup>	2 YE	<a href="#">Jôtô Heisho</a> , <a href="#">Science Officer</a>

## Pre-Military

Ruri was born to Meme Kurusu in the year, YE 31. Meme, a retired Star Army veteran had long since given up life on the frontlines and had become a respected doctor in her hometown of Ralt. As time went on, Meme soon wished to raise a family, and eventually gave birth to little Ruri and Sena. Ruri had never really cared for Ralt and once she was old enough elected to leave much to her mother's dismay as Sena had left the year before to go through training. While mother and daughter share a close bond, Ruri merely wished to go out and see the “world”. She was however unimpressed with it and eventually enlisted with the Star Army to travel and see the universe wondering if it would offer something to her liking.

## Military

Ruri's military career isn't a stellar rise in rank. Being a mere Nito Hei, Ruri has at least seen some action at the start of the NMX war before reassignment after her detachment had been nearly wiped out. Her remaining comrades however were not sad to see her go as the small Neko hadn't interacted with them much at all. Instead she would sequester herself in her quarters. Or if she was bothered by those she had a low opinion or rather no opinion of she was cold, uncaring and usually quite snappy. As such her superiors have often tossed her from regiment to regiment, platoon to platoon, squad to squad after a short time due to the petite neko's attitude.

## Skills

### Communication

Ruri is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. Ruri is fluent in Nepleslian and (optionally) Yamataian. She can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.

### Demolitions

Capable of identifying and disarming a range of bombs and other explosive devices, Ruri is able to manufacture small bombs from a range of items and is able to utilize plastic explosives.

## Fighting

Ruri received hand-to-hand combat training, followed up with a rigorous training program. She is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons. Weapons she is trained in include energy pistols, knives, and power armor. Due to her rigorous (And Dangerous) training under the orders of [Nagase Nagako](#), Ruri's standard infantry training has been honed to a razor's edge. She has been taught to fire most forms of standard solid munition weapons in addition to follow ups in hand-to-hand combat training beyond what standard Star Army Personnel are taught.

## Technology Operation

Ruri is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships. She is proficient in entering and/or searching for information. Ruri was further trained in information technology and including hacking, able to defeat common firewalls and safeguards and can render the same exceedingly difficult for others. Her knowledge of software and digital virii is all the way up to a high level understanding of advanced polymorphic viruses, ciphers and encryption softwares.

## Mathematics

Ruri received basic mathematics training, to including up to algebra and trigonometry.

## Knowledge

Ruri is well versed in the Laws and History of the Yamataian Empire, as well as being able to reference many different categories due to long hours spent reading.

## Vehicles

With her background as an infantry woman, Ruri knows how to drive most land-based vehicles utilized by the Star Army to some degree and operate their weapon systems. She is also capable of flying smallcraft such as shuttles and fighters if necessary.

## Culinary

Due to her fascination with sweets, Ruri studied a few different forms of cooking, mostly pertaining to baking. However she is knowledgeable in a few other fields when it comes to culinary delights.

## Rogue

Her training would not be complete without the ability to lie through her teeth and deceive others. Ruri has been taught the art of seduction by some of the best Black Spiral has to offer (Even if she detests it.) followed up by a rigorous course in the seedier practices of picking locks, picking pockets and infiltration.

## Survival

Ruri was taught the fundamentals of survival skills should the flashy survival kits fail her or run out before rescue arrives. Therefore she is capable of creating fire, hunting, finding water (And methods of purifying it) as well as shelter construction. She has however taken it upon herself to study the intricacies of land navigation including its possible hazards.
