## Physical Description

A product of a NH-33 and a Nepleslian born NH-31, Hiroshiko physique pushes the maximum of what her

NH-33 genetics allow. She has lighter tanned skin of her father, almond shaped violet eyes, black hair, and human ears (her father's influence)/hands. Hiroshiko's height is 180cm, has a weight that exceeds her fellow NH-33 at 60kg and 34D-24-34 measurements.

## Personality

Raised by a very serious and stoic clerk, a lot of this rub off on Hiroshiko in the short period of time she was raised by her. Though this has been chipped away a lot by the huge number of more childlike Nekoalkyrja she is surrounded by.

## History

### Pre-RP

Born at the beginning of YE 40, Hiroshiko is the product of two soldiers of the Star Army of Yamatai getting frisky while on shore leave. With Mikael disappearing (sent to another universe) around the time of her birth, Ingrid opted to raise the new youngling on her own. Which wasn't too difficult since it was she herself that brought Hiroshiko into the world.

### RP

In late YE 41, Santo Hei Mizumitsu was sent with a contingent of other technicians from the Nataria Fleet Depot to the Himiko system to help with faulty sensors. She would discover that the sensors on the YSS Dawn Hammer were completely trashed. But before she could even start to discover the cause her standard equipment was not detected, the Kuvexians attacked in mass.

As she was making her way back to speak with the ship's reactor engineer to receive a new task, a dark Elysian armor teleported onto the ship. The terror of seeing the figure in the distance caused her to freeze in her position and drop to nearby cover in hopes the dark angel would not see her. This spared her the fate of the engineers that were the true target of the fiend.

When she was able to come to grips with her reality once more, Hiroshiko would find that the ship's aether reactor was sabotaged to overload. Despite not being a propulsion engineer, the young systems technician and sensors specialists did her best to delay the inevitable until hopefully, someone with more knowledge would come by dumping the emergency coolant reserves into the reactor. A combat engineer would eventually materialize with his team.

With his help, Hiroshiko was able to stop the overload of the reactor with the use of subspace detonation mini-missiles. Though before she was able to activate the backup reactors, the engineering bay became a battleground of coolant leaks when the dark angel made his return and attacked. Hiroshiko only escaped death there to trigger the subspace detonation afterward due to instincts making her move her body while her mind went into shock.

She ended up arming herself to the teeth and escaped the ship with a surviving infantrywoman named

Tomoe. She now finds herself stranded on the Planet Himiko, holding it together mentally with the imagined and idealized version of Mikael Harris.

Together with her new partner, the pair managed to fight their way to safety and off-world. The experience bonded the two into becoming close friends.

After some psychological help and due to her actions on Himiko, Hiroshiko began training and completed supplemental training into the power systems of modern warships and returned to her assignment at Nataria Depot. Months later, she was caught up in the 3rd Battle of Nataria where she finally met her father. Learning a great deal in how he acted, her mother was not exaggerating about him at all.

Wanting to make up for lost time, Mikael gifted her a data shard with a number of unclassified combat techniques and personal memories he thought would be relevant to her. But what he did not tell her was that those memories contained an small AI based on her personality matrix (one of many) that he uses to help sort operational data. This particular one personifies his SAINT operative, remaining hidden from Hiroshiko except for when it feels she is in need of support.

After spending some time talking to him and her mother on Nataria, she is ready to head back out into the stars. She opted to apply for the exchange program with Nepleslia and was assigned to the flagship of the 3rd Assault Fleet, the NSS Wrath of Nepleslia. There she met up with her old combat partner on Nataria that had the same idea.

Hiroshiko was recalled from her exchange position due to the shortages of manpower experienced on the [YSS Wakaba](#). Remembering her time on Himiko, she dreaded having to set foot on another Sharie Class Battleship.

And her suspicions about that class of ships proved to be correct yet again when the ship disappeared in late [YE 43](#).

## Wakaba Files

*Deragmentation and reconstruction in process...*

### The Start

Hiroshiko was near engineering at the time when she became pinned down under wreckage when one of the conduits overloaded and exploded from the trip. She was saved by a science technician named [Hara Yuri](#), while directing X to take care of a plasma fire that erupted shortly after.

Shortly after, she was contacted by the ship's MEGAMI to help bypass its communication lines as the primary had been ripped away by the anomaly that had brought them to the location. Hiroshiko ventured to the destination location to complete the bypass and replace the burnt out router discovered there, unable to escape the a nearby conduit eruption.

Hiroshiko was on her way to commence a similar repair for the ship's sensors when the ship became under attack from a then unknown foe (NMX) started to soften the Wakaba for a raid. Hiroshiko would

encounter a lone [Ripper Power Armor](#) when she and another technician were attempted to initiate the wire bypass for the that part of the ship's sensor systems.

Wearing only an [Star Army Environmental Suit, Type 28 \(AMES\)](#), Hiroshiko swiftly got the floating head of her now dead partner and used the ship's maintenance corridors to escape the Ripper. After continuously ripping through the ship in pursuit of her (escaping into yet another maintenance corridor, the Ripper eventually got bored and looked for more worthy prey to kill.

Skills Learned

Skill	Training	Source
<a href="#">Communications</a>	Hiroshiko is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. Hiroshiko is fluent in Yamataigo (邪馬台語) and proficient in her natural wireless abilities. She can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.	<a href="#">Star Army Common Skills</a>
<a href="#">Fighting</a>	Hiroshiko received hand-to-hand combat training, followed up with a rigorous training program. She is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons. Weapons she is trained in include energy pistols, knives, and power armor. Her father imparted an annotated download of his combat skills as a gift to her (CRIED/Giretsu Training). She still needs to actually train and go through her own experience to actually master them.	<a href="#">Star Army Common Skills/Mikael Harris</a>
<a href="#">Technology Operation</a>	Hiroshiko is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships. She is proficient in entering and/or searching for information. She is knowledgeable in quantum computing, computing, optics, acoustics, nanotechnology operation, digital-signal processing (DSP), and has limited electronic warfare skills due to her specialty with sensors.	<a href="#">Star Army Common Skills</a>
<a href="#">Mathematics</a>	Hiroshiko received basic mathematics training, to including up to algebra and trigonometry.	<a href="#">Star Army Common Skills</a>
<a href="#">Maintenance and Repair</a>	Hiroshiko is a qualified SAoY Technician (Tech specialty) with an above average skill working with sensors. She also has a knack for making something out of nothing. Her experience on the YSS Dawn Hammer has helped push her to refine it and think outside of the box and train into the Starship Engineering specialty.	<a href="#">Star Army Technician</a>
<a href="#">Sciences</a>	Hiroshiko is knowledgeable in aerodynamics, electromagnetic physics, FTL propulsion, nuclear physics, atomic solid state physics, quantum mechanics, plasma physics, statistical mechanics, shield engineering, and other sciences related to reactors or propulsion. This is due to additional training she recieved after her experience on the YSS Dawn Hammer.	<a href="#">Star Army Technician</a>

## Social Connections

Hiroshiko Mizumitsu is connected to:

- Father: [Mikael Harris](#)
- Mother: Nito Heisho Ingrid Mizumitsu (NH-33 Clerk)
- Friend: [Kamiya Misakura](#)
- Daughter: [Mizumoto Reiko](#)
