## Physical Description

Weight: 12 lbs.

Height: 5 in. (6.5 in. with costume)

Build and Skin Color: Her skin is very pale, almost blank white. She has a somewhat skinny build.

Hair Color and Style: Her hair is light blonde and wavy, and of a medium length.

**Distinguishing Features:** She has a tail, which has fur with the same color as her hair. She's almost always in her robot costume, which increases her height to 6.5 inches. Her robot costume is mostly plastic and is painted silver. It looks like a robot version of a mini neko. In her costume her tail is disguised as an electrical cord.

## Personality

Momosumi may be a Miniature Neko, but she wears her robot costume almost all the time (at least when she's allowed to) and claims she's a mechanical robot. She does try to act like she's a robot, but her impressions aren't always accurate. Her personality differs much depending on whether or not she has her costume on. When she's not in her costume, she tends to be shy and doesn't insist that she's a gynoid. She's likely to be a bit more stealthy when she doesn't have her costume. When she does have her costume, she's very charming and she acts like she's a star.

## History

Momosumi was born in YE 39, and later that year she received training to join the Star Army of Yamatai. She became a SAINT operative and was sent to join a mission on Anisa.

## Skills Learned

**Communication:** Momosumi is familiar with basic radio operation and procedures and can make transmissions to and receive transmissions from other characters through headsets, starships, power armor, and shuttles in both combat and non-combat conditions. She is fluent in Trade (language) and (optionally) Yamataigo (邪馬台語). She can speak and write both correctly and efficiently and can write reports, fill forms, issue orders under fire, etc.

**Fighting:** She received hand-to-hand combat training, followed up with a rigorous training program. She is skilled and experienced in combat both in Yamatai-like conditions and in zero-gravity, with and without weapons. Weapons she is trained in include energy pistols, knives, and power armor.

**Technology Operation:** She is capable of operating any computer system that uses the Kessaku OS, found on all Star Army starships. She is proficient in entering and/or searching for information.

**Mathematics:** They received basic mathematics training, to including up to algebra and trigonometry.

**Entertainment:** Momosumi is skilled at performing on stage in front of an audience, though, she does better if she has a costume to put on.

**Rogue:** Being a SAINT operative, Momosumi is trained to use more stealthy skills such as lock-picking, pick-pocketing, and more.
