History

Pre-RP

- **YE 10** Takumi was born a **Human** and her name then was Sachi.
- **YE 20 Death** The colony that Sachi lived on was destroyed by the Elysian Navy. The colony records were turned to so much electronic gibberish due to an Electro Magnetic Pulse (EMP) detonation that wiped out the colony's electronic systems. She was in school at the time of the attack and was listening to her lessons via headphones. A surge of electricity caused by the EMP electrocuted her as well as destroying most of the school equipment. The combined effects of the electrical shock and the EMP, effectively wiped her mind clean. A scout ship was sent to investigate why the colony stopped transmitting arrived a few days after the destruction. One of the crew a **NH-7 Nekoalkyrja** named Otome found her. Otome took her back to the ship for treatment. There were no other survivors of the attack. The medic was able to treat the her physical injuries. During the treatment the medic determined that her mind was wiped clean. When the commander of the scout ship reported that they had a survivor, and were returning to base. The scout ship was ordered not to return, and given a new task. *(The military commanders at the time felt that having no survivors reported would best serve the Empire by uniting the populace behind this tragedy. However, seeing the value of having a 'survivor' to be revealed later, they wanted the child kept safe.)*
- **YE 20 Rebirth** The medic did not want to keep her in a vegetative state, so with the commander's permission she used the Soul Transfer technology aboard the ship giving Takumi Nekoalkyrja programming equal to a sprite. Takumi got her name from the necklace she had on when she was found. Waking up was a bit of shock for Takumi, expecting to see a Nekoalkyrja form, and seeing a small **Human** form with stubby ears and four fingers. Otome took her in and shared her nest with the child. Takumi adjusted to her new life. The Nekoalkyrja aboard were not used to children, but they did their best to make her happy. Otome would tell her stories and answer her questions, or when she could not, Takumi would look things up on the computer. She loved to draw and the crew would get her paints, pencils and paper. Later she learned to draw using the ship's computer as well. In time Takumi had even learned to help about aboard the scout ship, helping and doing made her even happier. Takumi was happy with her life among her Nekoalkyrja family.
- **YE 22 Age: (12)** Finally the powers that be determined that the time was right for the scout ship to return home. Takumi was returned to **Yamatai**, once there she and the crew became tools of public relations. The authorities had discovered her original name, and she was known for a time as Sachi the girl saved and raised by Nekoalkyrja. Takumi hated this new life, but she had sense of duty taught to her by Otome. Eventually the excitement died down and Takumi was no longer of real value. Otome requested that she be made the her guardian. Shortly after that event, Otome and the crew were given a new assignment. Takumi was placed in school with other **Human** of the same age. This was perhaps the most difficult transition for her. With her downloaded programming, most of the curriculum for children her age bored her. Also she was not used to interacting, playing in normal **Human** fashion. She stayed in touch with Otome as best as she could, and with time she learned how to interact with other children and began to make friends. The school put her in an advanced placement program for her schooling.
- **YE 25 Age (15)** War came to **Yamatai** the **Fourth Elysian War** came and Takumi's life changed.

When the decision to evacuate non-combatants to shelters. Takumi got separated from the group. While searching she came upon a group of [NH-17 Nekoalkyrja](#), preparing for battle. Takumi watched as they prepared their [Ke-M2 "Mindy" Series of Power Armor](#). This was a technology that Takumi was unfamiliar with but it intrigued her. She watched them streak away into the sky, and Takumi resolved to learn more about those wonderful machines.

- [YE 26](#) Age (16) Takumi started going to college. She had decided that she wanted to be an engineer to learn about the machines that [Ketsurui Fleet Yards](#) created, how they worked, and one day to create some herself.
- [YE 27](#) Age (17) During the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#) campaign Takumi suffered the personal loss of the closest thing she had to a mother. Otome was just one of the billions of [Nekoalkyrja](#) that died. While Takumi was proud that her mother had done her duty, she was now adrift. Without Otome Takumi feared that her dreams would come crashing down, Otome was the one paying for her expenses. Takumi took a trip with several of her college classmates to visit the [Ketsurui Fleet Yards](#). While there she kept asking very technical questions of the tour guide. During the tour the guide discretely asked the teacher about Takumi. Upon learning about the child's situation the employee contacted his supervisor. The supervisor spoke to the teacher about having Takumi apply for a internship.
- [YE 28](#) Age (18) Takumi was offered and accepted an internship with [Ketsurui Fleet Yards](#). Takumi was determined to make the most of the opportunity. She worked long hours and in her off-time she would spend hours going over the latest tech manuals. Her dedication and talents helped her to move up from her intern position to an employee position.
- [YE 29](#) Takumi also took the opportunity to upgrade to [NH-29](#). She wanted to understand first hand how [NH-29](#) species integrated with KFY technologies.
- [YE 30](#) Takumi finally achieved her goal of working in the Ketsurui design department. Starting in the lower positions, she quickly rose through the ranks until she was given the position of Ship Designer.
- [YE 31](#) Takumi was given the task of designing a ship for the [Scientific Studies Service \(SSS\)](#), the [Tansaku-class Science Vessel](#) was the first vessel that she was the head designer.
- [YE 33](#) Takumi upgraded to the [Minkan](#) body when it became available.
- [YE 35](#) After enjoying a lucrative career with [Ketsurui Fleet Yards](#) and seeing the draw down in activity for the military. Takumi resigned her position and took a position with [Tamahagane Corporation](#).
