Toyoda, Yujin	
Species & Gender:	Male Minkan
Organization:	Star Army of Yamatai
Occupation:	Star Army Pilot
Rank:	Nitô Hei
Current Placement:	YSS Teisenjou

Physical Description

Standing a little shorter than a normal Minkan at 4 foot 9, 145 pounds with violet almond-shaped eyes, and shoulderblade length braided violet hair with long elf-like knife ear jutting for the sides of his head. Pale white skin covers his face with a well-kept fu manchu with a goatee beard. Like his ears, Yujin has a very elven-like angular face with high cheekbones the rest of his jawline and chin narrowing out into what looks to be a rounded point. His voice is softer than most around him, but he has learned to make it carry well and be understood at some distance. Even after his transplant into a Minkan, he would talk softly like before even though he could be more normal.

Personality

Yujin is a hard-working person that likes to fly both in space and on a planet, has no fear of heights, and loves to rock climb. Tending to be bold he can get into trouble and over his head more often than not. One of his current goals is to become the best fighter/bomber pilot in the Star Army. When it comes to people Yujin is kind of shy and hard to read at times, But he has been forcing himself into more social settings to try and get over his issues. Yujin treats others with respect and will treat them how they treat him, so if they are rude he'll be rude back. It was just something his parents taught him growing up.

History

Toyoda, Yujin was born 9日 3月 17 in [Geshrinopolis](#). Born back in Geshrinopolis to his parents Takashi, and Kimiko of the family name Toyoda. Takashi worked in a large company and thus the family moved a lot, When the capital was bombed they were no longer there and the family was glad that the line of work they had allowed or forced them to move now.

Overall Yujin's life growing up was pretty normal he was a fun-loving boy that loved to climb just about anything and even sometimes would try to climb buildings without ropes. Luckily for him, he was not allowed to or was quickly caught and forced to get down of the buildings. His Fathers work left him alone a lot with his mother and younger sister, Taking to be the man of the house he took it upon himself to

make sure the family was protected and cared for. Even more so for his younger sister that if she was picked on he would go out of his way to make sure that those that treated her unfairly were treated in the manner that they treated her. Many thanks to how his parents both taught them to do to others as they want to be done to themselves. So in his mind, they treated Natsuko harshly they wanted to be treated the same way.

Time passed fast for Yujin and he was soon at the point in life where he had to choose to go on to college, get a job, or join the Star Army. Yujin decided to keep going with his education moving to the new capital of Kyoto, and attending a university that was there taking a degree that was akin to the maintenance and flying of planetary and spacecraft. He kept up with his family as they had settled down in some small out-of-the-way town.

Once out of the university, Yujin found a job piloting transport craft in Kyoto, some times YE 39 Yijin underwent body transfer into a Minkan to help with piloting and give him an edge in other factors of his life.

Later on, after a while and much research into it, Yujin enlisted in the Star Army of Yamatai and underwent training to become a fighter pilot. While in training his pilot license and skill with flying gave him an edge over the others that had no experience and upon its conclusion, he was assigned to the YSS *Azalea II*, to serve under Chui Hotaru Sasaki.

Skills Learned

Being alone at home with his mother and younger sister he helped out around the house by means of making sure it was cleaned, vacuuming the rugs, and sweeping the floors as needed to help with doing the laundry and cooking on the days his Mother was not up to it.

His time in university taught him the skills needed to pilot mecha, planetary, and space-based craft from small shuttles to larger almost frigate-sized craft. Although more time was spent on piloting and maintenance of fighter/bomber craft and mecha. Yujin spent more of the training for fighters and bombers over mecha and more time on piloting planetary transport craft. thus Yujin has a basic understanding of how to repair and maintain a wide variety of vehicles included in the life of a normal citizen and a few more combat-themed fighters and mecha.
