## Inside the EM-K4-2a

Entry to the cabin is through the gull-wing pneumatic doors. The cabin of the EM-K4 contains four seats. The driver sits in the left front seat.

## EM-K4-2a Systems

The Em-K4-2a has [all the standard Em-K4 systems](#), and the following additional systems.

## **EM-K4-S3300 Containment Force Field**

The rear portion of the K4 is equipped with two independent containment force fields. These are used to confine prisoners to their seat.

## **EM-K4-E3304 Surveillance Module**

The Zephyr 2a is equipped with two surveillance modules; one in each of the bumpers. It contains a shotgun microphone with a telephoto x1000 zoom digital camera. The camera has three modes of operation, normal light, night vision, and infrared.

## **EM-K4-E3305 Electronic Monitoring**

The Zephyr 2a is equipped with an additional system; that allows it to scan for electronic signals and monitor them. It is synced with the forward Surveillance module.

## **EM-K4-W3300 Enforcer Cannon**

The Zephyr 2a is equipped with a non-lethal weapon system. It can fire one of two types of spherical projectiles. It carries ten of each of the following. It is reloaded through the forward storage area. The cannon is mounted in the front of the vehicle just to the left of the license plate.

### **Taser Ball**

This ball is approximately 6.7 cm (2.63 in.) in diameter. It consists of a mass of polymer and wire strands that end with a small barb. When it strikes a target, the strands unwind swiftly and wrap around the target. The core of the ball then applies an electrical current to disrupt voluntary control of the targets muscles to immobilize them.

It is possible for a person to break free of it, however, the unit will discharge again if it senses too much pull on the strands.

### **Bean Bag**

This is a spherical bag approximately 6.7 cm (2.63 in.) in diameter. The bag is filled with lead shot and fired at a speed of 90 meters/second. Typically this weapon is aimed at the targets extremities to avoid possible internal injuries.

## EM-K4-W3301 Grenade Launcher

The Zephyr 2a is also equipped with a gas grenade launcher capable of propelling the grenades up to 50 meters. It is typically loaded with smoke, tear gas; sleep grenades from whatever source the law enforcement agency uses.
