

EM-J5-G3601 - Charging system

Emrys Industries

A Tamahagane Company

The EM-J5-G3601 charging system was developed for use in the [EM-J5 Flying Assistant Robot Series \(FARS\)](#), it became available in [YE 36](#).

About the EM-J5-G3601

The EM-J5-G3601 has two modes of charging. It can connect to any standard power outlet for quick charging. The other mode is induction, as long as the robot is in a starship or large building it will use the ambient energy to charge. It can also do the same with any other high energy source such as a vehicle, and power armor.

Direct charge takes 1 hours.

Induction charge is continuous, but if the robot is inactive it can recharge the power cell in four hours.

Details

- Manufacturer: [Emrys Industries](#)
- Nomenclature: EM-J5-G3601
- Type: Charger
- Class: Generator
- Designer: [Tamahagane Corporation R&D](#)
