

# SYNC

The *Secure Yamataian Network Communications (SYNC)* is the civilian network designed to handle planetary, interplanetary, and interstellar communications. In [YE 34](#) it became the primary network for all [Yamatai Star Empire](#) civilian communications.

## About

The *SYNC* is a *heuristic encrypted meta-communications electronic network*, a multi-tiered system of networked artificial intelligences and subsystems. *SYNC* is designed to handle all forms of telecommunications, computer networking. It has different levels of access to ensure security and privacy. It is a high-tech Empire-wide equivalent of today's Internet. All computers that access the system must be authenticated to have higher levels of access. Otherwise they default to public (minimal) clearance.

The *SYNC* is capable of being tied into other networks such as [PANTHEON](#) and InterNep. However, the user must have appropriate access to those other networks to gain access.

## History

With [Emrys Industries](#) securing a government contract to setup and maintain communication satellite networks in [YE 34](#), they needed a way to manage the network. [Emrys Industries](#) worked with the [Scientific Studies Service \(SSS\)](#) to develop the network. The *SYNC* is the result of that effort and was expanded to cover communications throughout the Empire.

## Infrastructure

The *SYNC* establishes a node by the installation of a [Ge-H2-E3300 - Senkun Dual Quantum Computer System](#) or equivalent at a central location in a star system. More powerful computers can also be used. The node can be orbital or planetary.

Due to the scope of *SYNC* a separate division was established called [SYNC Systems](#) to manage the network.

# Connections

The SYNC can be accessed by these systems.

- [STATCOM Network](#)
- [Ge-H3-E3300 - STATCOM Network \(Civilian\)](#)
- [PANTHEON](#) - Public Access
- InterNEP - Public Access
- [Lazarus Network](#) - Public Access
- [Virtual Collective Experience](#) - Public Access

## Nodes

The SYNC is comprised of [SYNC Nodes](#).

## OOC Notes
