

Emrys Industries Balaclava

Manufacturer: [Emrys Industries](#)

Made for cold weather, and for some other covert situations. The  [Balaclava](#) is made from warm material, and, unlike most balaclavas, are very comfortable and not itchy. The eyes are covered by the balaclava, but they are one way light permeable, meaning that you can't see the eyes from the outside, only grids of fabric, but you can see from the inside. In addition over the mouth is a form of special material that filters the air being breathed in, getting rid of toxic gasses, using a series of selectively semi-permeable membranes. In side the balaclava are ceramic plates, allowing for good quality head protection.

For an additional 11 ks the eyes can be fitted with screens that can monitor infrared monitors and allow the person wearing the balaclava to see heat etc.

Price: 22 [KS](#) **With infra-red:** 33 [KS](#)

OOO Notes

Approved by [Wes](#) on October 21, 2005 here
