

Frontier Banking Service

The economic center of the [Frontier Service Corporation](#) that gives currency equivalency to the [Independent's Arcmark](#).

About the FBS

Created by Mr. Donovan in [YE 39](#) to assign value to the currency of the [USO](#) (Arcmark) by essentially purchasing arcmarks with the long term purpose of helping other frontier colonies the same way. By charging a small processing fee for currency conversion colonies can participate in interstellar trade without having to be recognized politically by other governments. While buying out the currency would seem like a huge waste of money it secured the presence of FSCorp on the [Planet Osman](#) and gave the corporation political sway.

Unfortunately the largest weakness in this fragile method of economic growth was discovered as the R&D branch of [Sky Guard](#) called [Section 6](#) began heavily outsourcing to [Iemochi Innovations & Sales](#). Come the last month of [YE 39](#) the purchase of two [Albion carriers](#) removed 160 million KS from circulation. Only days later the Banking Service was shut down as they had run out of convertible denominations, thus rendering the Arkmark valueless. This economic collapse resulted in the [Frontier Service Corporation](#) making an immediate shift from honorable corporation to economic syndicate as they scrambled to restore life to the planet's economy.
