

Galactic Horizon 7.7x30mm

Galactic Horizon 7.7x30mm is a smaller yet hard-hitting caliber of ammunition designed and manufactured by [Galactic Horizon](#) beginning in [YE 41](#) for heavier sidearms and more compact rifles, available in both a supersonic and sub-sonic variant.

It can be easily considered the older “magnum” sibling of the company's eventual [Galactic Horizon 7.7x15mm](#) cartridge, with a nickel-plated brass casing and a solid block of premium-quality, high-velocity propellant. The supersonic variant uses a penetrating steel core beneath an anodized and  [Teflon](#)-coated [Durandium Alloy](#) shell. The subsonic variant is very similar though uses different, heavier metals to maintain stopping power without breaking the sound barrier, with an anodized and  [Teflon](#)-coated [Skusten](#) shell in place of the [Durandium Alloy](#) one and a [Nerimium](#) penetrator rather than solid steel. There is additionally a rarer self-defence variant of both types with a frangible nose to maximize the transfer of energy as well as a scored metal jacket to create a more vicious wound-channel via rapid expansion and minimize over-penetration compared to the more traditional design.

Funnily enough the slower, subsonic variant's [Skusten](#) outer shell makes it work exceptionally well with electromagnetic acceleration technologies, the frangible-nosed variant will travel just as far and be just as accurate though will suffer more shallow penetrative qualities than its more traditional counterpart.

Stats

Some basic text about the stats, such as highlights, goes here.

Galactic Horizon 7.7x30mm Subsonic

- Damage Rating: Tier 2, Medium Anti-Personnel
- Size: 7.7x30mm
- Caliber: .303
- Damage Description: A small round going really fast that is designed to punch holes through weaker body armour and remain quiet while doing so.
- Effective Range: 650meters/710yards
- Muzzle Velocity: 1,000 feet per second
- Muzzle Blast: A cone of fire erupts from the weapon's barrel with each shot as escaping gasses are burnt off.
- Recoil: Moderate
- Energy Source: Chemical Projectile propulsion
- Price (100 Round Box): 50ks/100rn/[refer to here for currency exchange](#)

Galactic Horizon 7.7x30mm

- Damage Rating: Tier 2 Medium Anti-Personnel
- Size: 7.7x30mm
- Caliber: .303
- Damage Description: A small round going really fast that is designed to punch holes through

weaker body armour.

- Effective Range: 1,800meters/1968.5yards
- Muzzle Velocity: 3,000 feet per second
- Muzzle Blast: A cone of fire erupts from the weapon's barrel with each shot as escaping gases are burnt off.
- Recoil: Moderate
- Energy Source: Chemical Projectile propulsion
- Price (100 round box): 40ks/80rn/[refer to here for currency exchange](#)
