

Eclipse Laser Gear

The Eclipse Laser Gear (ELG) is a fullbody suit combined with plastic armour components fitted with receptors synchronised with the emitters fitted to the included rifles. Designed to be an affordable and easy to manufacture laser tag equipment set for entertainment franchises and corporate staff events with the ability to work in any environment making them viable within an office as much as an open field. It was created in YE 40 by [Galactic Horizon](#) just before their quarterly staff social as an entertainment solution for the group.

About the ELG

Cutting edge military precision laser receptive bodysuits and armour components designed to be affordable for groups to buy in bulk and replace if damaged, offering an immersive experience in mock combat for anyone to make use of. With a stylistic HUD included on the light helmet to simulate a real battlefield situation along with the [Dawn](#) AI implemented as the “Commander” voice in the earpieces.

Groups using this product:	Galactic Horizon , open market
Type:	Entertainment Equipment
Nomenclature:	GH-g2-2a
Designer/s:	Galactic Horizon
Manufacturer:	Galactic Horizon
Entered Service:	YE 40
Pricing	1 000KS ¹⁾
Life Expectancy	Indefinite

Appearance

Information pertaining to the physical description of the Eclipse Laser Gear, colours, shapes and size information.

Eclipse Suit

The bodysuit comes in black or white with coloured stripes on the arms, legs and chest that can be programmed to display any desired colour to make teams or special targets. The suit covers the entire body up to ankles, wrists and necks and is made of a soft spongy material coating a fullbody flexible frame of pressure pins.

Eclipse Helmet

The helmet is an adapted variant of the [Adrenaline Utility Gear](#) Pioneer Helmet with the filter system removed and laser receptors added in its place. This variant also contains programmable strip lights around the crown to identify team, the visor is modified to block out the infrared beams projected to ensure no eye damage is sustained.

Function

Information pertaining to the practical function of the Eclipse Laser Gear, how the suit functions, its general composition and the modifications made to the helmet.

Eclipse Suit

Comprised of a flexible suit of pressure pins that are activated when an IR receptor is triggered to simulate being hit in the location activated. This system allows for the user to experience mock combat in a safe but realistic way with each registered hit triggering a slight pressure while the spongy coating all over keeps it safe for the user.

Eclipse Helmet

A modified model of the Pioneer Helmet from the AUG set that acts as the control centre for the full suit, the visor is reconfigured to display the otherwise invisible IR beams allowing players to see the beams while protecting their eyes from harm.
