

Volumetric Display Module

The Volumetric Display Module, more commonly known as the VoDiM, is a high-quality and high-resolution [volumetric projection](#) device designed and manufactured by [Galactic Horizon](#) in [YE 40](#) that, similar to the [Rip-Pod Parachute System](#), was made to be yet another easy-to-implement component prior to becoming commercially available to the general public.

Designer:	Galactic Horizon
Nomenclature:	GH-U9-5Y

History

The GH-U9-5Y Volumetric Display Module began life as a component in the majority of [Galactic Horizon's](#) computers and meeting rooms. It was just something they knew how to make well and would have stayed purely in-house if not for [Donvan Black](#) asking the big question of:

"Dad, why don't we try selling this?"

Function and Design

Each Volumetric Display Module is a 15cm long by 15cm wide x 10cm tall [Durandium Alloy](#) four-sided pyramid with a flat top that its volumetrics are projected from, while the bottom of the unit is lined with a series of data and power hook-ups. A VoDiM unit is capable of projecting [volumetric displays](#) that are up to 20ft (6.06m) long, 8ft (2.43m) wide, and 8.5ft (2.59m) high or [solid volumetric constructs](#) of various consistencies that are 5ft (1.52m) long, 5ft (1.52m) wide, and 7ft (2.13m) high - and can produce both types at a resolution that is indiscernible from the real deal.

There is a 1cm taller version that features an internal fusion battery; additionally, Volumetric Display Modules are usually embedded into surfaces such as ceilings, countertops, desks, floors, and walls - as only the topmost face of the unit needs to be exposed in order for it to function.

Appearance

The VoDiM is a small four-sided pyramid with a flat top that glows white when the unit is active; each is constructed out of [Durandium Alloy](#) and typically colored gunmetal grey.

Availability

The Volumetric Display Module is available from [Galactic Horizon](#) directly, their approved associates and

affiliates, and most hobbyist electronics stores.

- **Recommended Retail Prices**

- Non-Powered: 350KS/[refer to here for currency exchange](#)
- Powered: 450KS/[refer to here for currency exchange](#)
- Wireless Communications Module: 50KS/[refer to here for currency exchange](#)

*Disclaimer: No matter where the unit is sold or fabricated, the components have a Galactic Horizon watermark engraved into them.

OOC Notes

[SirSkully](#) created this article on 2018/09/09 13:48; frostjaeger [approved](#) it (using the [checklist](#)) on 2018/09/10 21:20.
