

BreachaNova Heavy Shotgun

The BreachaNova is a redesigned variant of the [Supanova Infrared Shotgun](#) intended for combat use rather than recreation. It was designed by [Galactic Horizon](#) in [YE 40](#).

About the BreachaNova

The BreachaNova was designed for the sole purpose of acting as a heavy breaching firearm to be used with [power armour](#). This particular shotgun utilises larger-than-normal ammunition (which measures 10cm long, as opposed to the standard 6cm length 12 gauge ammunition), thus standard ammunition will not work with this weapon.

Nomenclature Information

General information about the BreachaNova Heavy Shotgun, including the designer, manufacturer, some basic information, and a nomenclature tag.

- Designer: [Galactic Horizon](#)
- Manufacturer: [Galactic Horizon](#)
- Name: BreachaNova Heavy Shotgun
- Nomenclature: GH-W2-4L
- Type: High-Powered Shotgun
- Role: Breaching Shotgun
- Length: 20in
- Mass: 6kg

Appearance

The BreachaNova resembles the [SupaNova IR Shotgun](#) from the company's [lasertag line](#); unlike the lasertag version, however, the BreachaNova comes in red instead white or black. It also retains the pump and hand-guard design and the short - but extendable - stock.

Discharge Information

General information about the BreachaNova's discharge, including details of visible and audible actions and effective ranges.

- **Muzzle Flash:** A wide, bright cone of orange light is emitted from the barrel upon discharge.
- **Retort:** A reverberating bang accompanied by a loud thunk.
- **Projectile Appearance:** A large slug or close grouping of thick pellets depending on the shell used.
- **Effective Range** Depends on the shells used; overall, however, the BreachaNova is designed for extremely close quarters breaching operations.
- **Rate of Fire:** 1 shell per second, provided the user can pump the shotgun that fast.
- **Recoil:** Moderate with a lot of upward motion; recommended for use only with [power armour](#) or heavy strength-enhancing armour.

Ammunition

The various ammunition types used by the BreachaNova are intended to punch through walls and armour alike and include an explosive shell for special occasions.

- Ammunition [Class 2 Kinetic Shells and Slugs](#) measuring 10cm in length.
- **Purpose:** Variable
- Round Capacity: 4 shells

BreachaNova Ammunition Damage Quickchart	
Shell Type	Purpose
Explosive Shells	Tier 4, Light Anti-Armor ¹⁾
Superdense Slugs	Tier 7, Light Anti-Mecha

Weapon Mechanisms

Below are general descriptions about how the BreachaNova Heavy Shotgun functions and cycles.

- **Firing Mechanism:** Standard pump-action shotgun loading and firing mechanism.
- **Loading:** Shells are fed into the tube through a slot on the shotgun's underside. Empty shell cases are ejected from the right side of the receiver.
- **Firing Modes:** Pump-action or safety modes only.

- **Safety Mechanism:** A switch on the side of the weapon near the trigger.
- **Weapon Sight:** Standard basic iron sights along the top rail.
- **Attachment Hard Points:** A single rail on the left side of the weapon for a laser pointer or flashlight.

Pricing

General information about the pricing of the BreachaNova Heavy Shotgun's ammunition, attachments, and replacement parts.

- **BreachaNova:** 1 250KS

Replaceable Parts and Components

- **Firing Mechanism:** 450KS
- **Tube and Barrel:** 200KS

Optional Attachments

- **Laser:** 50KS
- **Flashlight:** 50KS

Ammunition

BreachaNova Ammo Price Quickchart	
Type	Price (80 Round Box)
Explosive Shells	200KS
Superdense Slugs	200KS

OOO Notes

[club24](#) created this article on 2018/08/26 07:44; [approved](#) it (using the [checklist](#)) on 2018/08/28 08:26.

1)

Per pellet; each Explosive Shell carriers twenty of them.
