

Geshrinari Magazine

Styled after the [Standard Star Army Magazine](#), the [Geshrinari Shipyards](#) is constructed of [Osmiridium](#). It is found on ships designed to use the [Ge-Z1 Series Torpedoes](#). The armory is a restricted area and is a cooled, static-free vault that can span two decks.

A [standard ship's door](#) with a [Ge-Y1-E3103 - Intercom System](#) opens into the room, the door is always locked and a [blast shutter](#) secured. The floor is covered in a non-static skid resistant surface. There is ceiling mounted lighting, as well as [Ge-Y1-E3104 - Automatic Fire Suppression System](#) dispersal nozzles through out the suite.

The magazine has a set of racks that hold the torpedoes. Another set of racks is where the warheads are stored. The magazine has robotic arms configure the armaments, load or unload them into their racks. The arms also move the completed weapon into the weapon transfer system to the [Ge-C1-W3300 - Torpedo Launcher](#).
