

Ge-L6-E3600 - Enhanced Intercom System

The Ge-L6-E3600 Enhanced Intercom System is an option that can be installed on [Geshrinari Shipyards](#) vessels built after [YE 35](#).

Every room on the ship except bathrooms, have at least one wall mounted intercom console. The console has an integrated speaker and omnidirectional microphone. A push button switches the intercom on and off. The system when first activated responds to verbal command. The user after pressing the button states the location to be contacted; eg. Medbay, Engineering, Stateroom 4. The computer then routes communications between the two locations. Crew member voice prints allow access to controlled options; eg. Ship wide, Helm.

The Ge-L6-E3600 panel is often found next to doors to rooms, it is used both as a door control, and a way to speak to the person in the room. Depending on where the panel is to be installed, it can be programmed with different functions. The Ge-L6-E3600 can also be installed in consoles.

The [Ge-Y1-E3104 - Automatic Fire Suppression System](#) ties into the intercom for emergency notification.
