

Geshrinari Shipyards - Spaceports

Geshrinari Shipyards Spaceports are configurable spaceports which can be deployed with a variety of configurations and modules. Each Spaceport consists of some or all of the following components, regardless of whether it is a planet-side installation or a space structure.

Components

Space ports are divided into various components depending on their purpose.

- [Port Control](#)
- [Port Security](#)
- [Systems Maintenance](#)
- [Flight Pads](#)
- [Flight Pads - Retracting](#)
- [Passenger Area](#)
- [Cargo Processing](#)
- [Cargo Storage](#)
- [Service Berth](#)
- [Construction Dock](#)
- [Customs Office](#)
- [Services](#)

Concourses

Each Spaceport employs a number of long, open spaces which connect to the various components that the spaceport may be configured with. Concourses allow the movement of personnel, cargo and equipment from one section of the spaceport to another. The level of comfort and luxury of the concourses can be determined when the spaceport is being built; concourses can be basic, with simple amenities and functional design choices, or 'deluxe', with more creature comforts and artistic flair.

Standard Configurations

- [Small Spaceport](#)
- [Medium Spaceport](#)
- [Large Spaceport](#)
